# STANDARD OPERATION PROCEDURE FORM - TW001

Department: Tank Wash		Operation: Nitrogen Blanket		Prepared By: Jose Acosta	
NO.	OPERATION SEQUENCE	KEY POINTS	Initials		
1	Trailer should be parked on the parking pad south of the chemical storage pad.	Make sure trailer is chocked, blocking one tire completely in (one in front and one behind the same tire).		Date: _____	
2	Hook up ground cable.	Make sure ground cable is hooked to the frame, NOT to the fender.		Start time: _____	
3	Pull up sample ladder to the vent line.	Make sure ladder is in a stable position so it does not wobble or sway in any way. If ladder has a "brake" or "set" make sure it is being used.		Trailer # _____	
4	System check	Check all hoses for signs of damage or possible leaks. If damage is found notify supervisor and record it. Ensure that the nitrogen return pressure gauge is connected and crow fitting are tightly together. Ensure LEL meter is with in calibration date and is functioning properly.		LEL Meter # _____	
5	Grab the line from the scrubber, climb ladder and hook up it the vapor recovery line on the top of the tanker. Open the valve.	The vapor recovery outlet on the top of the trailer should be a crows foot fitting. Make sure the fittings are together tightly and to ensure vapors are not leaking out.			
6	Unset brake on ladder and move it to the clean out/knock out valve area of the trailer.	Make sure ladder is in a stable position so it does not wobble or sway in any way. If ladder has a "brake" or "set" make sure it is being used.			
7	Climb ladder and unscrew the clean out/knock out valve and connect the nitrogen adapter fitting.	This needs to be done in a timely manner as to minimize vapor release. Ensure the valve on the adapter fitting is closed while connecting.			
8	Grab the nitrogen line and hook up to the nitrogen adapter fitting.	Check to ensure a tight fit between the adapter and nitrogen line. Tell operator on the ground to open the nitrogen feed to the tanker. Check for leaks.			
9	Record purge start time.	Allow 10 min to purge the trailer. Monitor the nitrogen return gauge pressure, it should not get above 1 PSI. DO NOT PRESSURIZE THE TRAILER!!		Purge Start Time: _____	
10	Turn off the nitrogen, disconnect the nitrogen line, remove the nitrogen adapter and reinstall the clean out/knock out valve.	Check the nitrogen return pressure gauge and record the PSI. The gauge should have ZERO PSI.		Purge End Time: _____	
11	Move ladder to the vapor recover line and disconnect.	Close the valve on the vapor recovery line before disconnecting the crows foot fittings.			
12	Open dome lid and check LEL	LEL must be below 10% for this procedure to be complete. If LEL is above 10% repeat steps 7 thru 10 until LEL is below 10%. DO NOT breach the dome lid!! Record final acceptable LEL.		Final LEL _____ %	
13	Inspect equipment and return them to their designated locations and record finish time.			End Time: _____

Carrier's Name: FIREBIRD BULK CARRIERS, INC.

Carrier's No.

RECEIVED, subject to the classifications and tariffs in effect on the date of the issue of this Bill of lading,  
HUMBLE, TX.

FROM PHOENIX OIL, INC.

at (Date)

the property described below, in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as shown below, which said company (the word company being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its own railroad, water line, highway route or routes, or within the territory of its highway operations, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed, as to each carrier of all or any of said property over all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the terms and conditions of the Uniform Domestic Straight Bill of Lading set forth (1) in the Uniform Freight Classification in effect on the date hereof, if this is a rail or rail-water shipment, or (2) in the applicable motor carrier classification or tariff if this is a motor carrier shipment. Shipper hereby certifies that he is familiar with all the terms and conditions of the said bill of lading, including those on the back thereof, set forth in the classification or tariff which governs the transportation of this shipment, and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns.

(Mail or street address for purposes of notification only.)

Consigned TO

Subject to Section 7 of conditions, if this shipment is to be delivered to the consignee without recourse on the consignee, the consignee shall sign the following statement:

The carrier shall not make delivery of this shipment without payment of freight and all other lawful charges.

-Destination HARRIS Street TX. City  
County State Zip

Route Delivery Address AMERICAN PETROLEUM RD.

Delivering Carrier FIREBIRD BULK CARRIERS, INC. Car or Vehicle Initials and No. 236-340

**POLLUTION CONTROL INDUSTRIES WASTE STREAM RECERTIFICATION**

All waste streams not received by Pollution Control Industries for longer than one year are considered inactive and must be recertified before shipment.

WASTE STREAM NUMBER 9025403H CURRENT PROCESS CODE H061  
 Original Approval Date 11/14/05 Last Shipped On 4/16/09  
 Generator CESE Environmental Svcs. Inc. Billing Name same  
 Address 4904 Griggs Rd. Billing Add \_\_\_\_\_  
 City Houston State TX City \_\_\_\_\_ State \_\_\_\_\_  
 Phone: 713-676-1460 Phone: \_\_\_\_\_

**Please Check the Appropriate**

\*\*\*\*ALL PROFILES WITH ORIGINAL APPROVAL DATE PRIOR TO FEBRUARY 1, 2003 MUST HAVE COMPLETED PROFILE INCLUDED WITH RECERT FORM.

\*\*\*\*ALL PROFILES THAT HAVE HAD CHANGES TO PROCESS GENERATING OR WASTE CHARACTERIZATIONS MUST HAVE COMPLETED PROFILE WITH RECERTIFICATION FORM

- Has the waste stream change since the original approval??? (Changes can include: Process generating, physical or chemical characteristics, or RCRA or DOT characterization) ☐ Yes ☒ No
- Was the original approval date prior to February 1, 2003? ☐ Yes ☒ No

If the answer was 'Yes' to EITHER questions 1 or 2 then please forward current copy of the waste waste stream profile with this recertification statement

If the answer was 'No' to BOTH questions 1 and 2 then

I certify this waste and it's process generating, RCRA and DOT classification, and chemical and physical properties have remained unchanged since the original approval. ☒ Yes ☐ No

I hereby certify that the above and attached description is complete and accurate to the best of my knowledge and ability. Any changes that have occurred to this waste stream have been disclosed and a copy of the current profile provided. No deliberate or willful omissions of composition or properties exist and that all known or suspected hazards have been disclosed.

Min %

Max %

**TOLUENE DIISOCYANATE**

**99.00**

**100.00**

**OTHER WASTE STREAM INFORMATION:**

Waste Stream Approval Notes :

Is this waste a "USED OIL" per 40CFR PART 279?

No

If "Yes", does the total halogen content exceed 1,000 ppm

If "Yes", can you rebut the presumption that this material is a "Hazardous Waste"?

Does the Waste have any of the following characteristics?

<u>_____</u> Oxidizer	<u>_____</u> Organic Pero	<u>_____</u> Wate Reactive	<u>_____</u> Air Reactive	<u>_____</u> Pyrophoric	<u>_____</u> Dioxin
<u>_____</u> Radioactive	<u>_____</u> Infectious	<u>_____</u> Pathogen	<u>_____</u> Carcinogen	<u>_____</u> Etiological	<u>_____</u> Explosive
<u>_____</u> Shock Sens	<u>_____</u> Will Undergo Hazardous Polymerization			<u>_____</u> Cylinder	<u>_____</u> Aerosols

EPAHO019001773

PCB'S	<u>X</u>	None	<u>          </u>	< 50 ppm
Sulfides	<u>X</u>	None	<u>          </u>	< 50 ppm
Cyanides	<u>X</u>	None	<u>          </u>	< 50 ppm
Phenolics	<u>X</u>	None	<u>          </u>	< 50 ppm

If "Yes", please list concentration in ppm: 0 ppm.

OTHER WASTE STREAM INFORMATION CONTINUED:

	Yes	X	No
Is the Waste subject to RCRA Subpart CC controls?			

If "No", does the Waste meet the organic LDR exception for UHC'S (40 CFR 268.48)? 268.48.2

If "No", does the Waste contain <500ppm volatile organic (40 CFR 265 SUBPART CC)? X    Yes    No

Does the Waste contain any Class I or Class II ozone-depleting substances? Yes ☒ No ☐

If PCB'S are present, is the waste regulated by TSCA per 40 CFR 761? N/A Yes X No

**Method of Shipment:**

<u>      </u>	Bulk Liquid (>500 Gallons)	<u>      </u>	Bulk Solids (roll-off box, vacuum box, etc)	<u>      </u>	Lab Pack
<u>      </u>	Cubic Yard Boxes	<u>      </u>	Totes (Please specify size)		
X	Drums (Specify size)	85	X	55	30
				15	5
					Other

Shipping Frequency:

-----------------	------	-----	-------	---------	---	------	-------

Container Type ☐Metal ☐Plastic ☐Fiberboard ☐Combination (EX: Glass containers in metal drum)  
Other: (Please Describe) \_\_\_\_\_

Is this RCRA exempted?	Yes	X	No
------------------------	-----	---	----

Is this a USEPA "Hazardous Waste" per 40CFR 261.3?	X	Yes	No
--	---	-----	----

Is this a "Universal Waste" per 40CFR part 273? Yes ☐ X No ☐

Is this a poison Inhalation Hazard?	Yes	X	No
-------------------------------------	-----	---	----

Is this a U.S. Dept. of Transportation(USDOT) Hazardous Material? ☒ Yes ☐ No

Proper D.O.T. Shipping Name: WASTE Toluene diisocyanates

Descriptors: (TOLUENE DIISOCYANATES)

Hazard Class: 6.1

UN/NA: UN2078

Packing Group:

II

Proper Waste Codes:

D003,U223

Is this a state regulated waste?

Y/N Yes

If YES:(Please list all applicable waste codes) \_\_\_\_\_

9025403H

---

**GENERATOR CERTIFICATION:**

I agree by assignment of my email address to substitute as my personal signature that I hereby certify that the above and attached description is complete and accurate and that no omissions of characteristics, composition or properties exist and that all known or suspected hazards have been disclosed. I also certify that each sample provided to PCI is representative of the waste material described above and give PCI permission and consent to make amendments and corrections and that I am an authorized agent of the Generator.

The City of Houston Boiler Board:

This is to introduce James Pharms. James has been operating the following Boilers since his employment with CES Environmental 5 years ago.

Cleaver Brooks

# 180235

160 HP 6,280,000 BTU

Operating pressure 100 PSI

Williams and Davis

80 HP 3,360,000

Operating pressure 100 PSI

Williams and Davis

30 HP

Operating pressure 100 PSI

All of these are used for process steam.

Based on James Pharms time operating the above boilers , please allow him  
To take the exam for the 3<sup>rd</sup> grade test.

Respectfully,

Steve Stricker

<https://onlineeast1.bankofamerica.com/cgi-bin/ias/A/5/AccountDetailsControl?myaction=AccountDetails...> 10/2/2008

Product Name: **WS-609 LATEX SKIN CUTTER**

Last Update: January 3, 2006

**MATERIAL SAFETY DATA SHEET** (Prepared according to 29 CFR 1910.1200)

**SECTION I - Manufacturer's Name**

Montgomery Manufacturing Co., 118 Industrial Ct., Kennedale TX 76060.

Information: +1 817-478-3221. Toll free US & Canada: 800-234-0088.

Emergency: InfoTrac, +1 352-323-3500. Toll free US & Canada: 800-535-5053.

**SECTION II - Hazardous Ingredients**

A proprietary blend of surfactants (trade secret), including Sodium Metasilicate, CAS No. 6834-92-0, TLV: (ACGIH) 2mg/mg<sup>3</sup>.

**SECTION III - Physical Data**

Boiling Point: N/D. Specific Gravity (H<sub>2</sub>O = 1.0): N/D. Solubility in Water: Complete. pH: N/D. Appearance and Odor: Tan liquid with characteristic odor.

**SECTION IV - Fire and Explosion Hazard Data**

Flash Point: N/D. Flammable Limits: N/D. Extinguishing Media: Use media suitable to surrounding fire. Special Firefighting Procedures: Normal protective clothing. Self contained breathing apparatus should be provided to firefighters in confined spaces. Unusual Fire and Explosion Hazards: None known.

**SECTION V - Reactive Data**

Stability: Stable. Incompatibility: Avoid contact with strong acids. DO NOT store in aluminum container. Hazardous Decomposition Products: Carbon monoxide and carbon dioxide.

**SECTION VI - Health Hazard Data**

Eyes: Irritant. Skin: Irritant. Oral: Intestinal tract irritant. Inhalation: Irritant. Health Hazards - Acute and Chronic: None known. Medical Conditions Aggravated by Exposure: None known. Carcinogen or Suspected Carcinogen Ingredients: NTP: None. IARC: None. OSHA: None.

**SECTION VII - Emergency and First Aid Procedures**

Eyes: Flush with water. If irritation persists, seek medical attention. Skin: Wash thoroughly with soap and water. If irritation persists, seek medical attention. Ingestion: If swallowed, DO NOT induce vomiting. Give water and seek medical attention. Inhalation: Get to fresh air. Administer oxygen or artificial respiration if needed. If irritation persists, seek medical attention.

**SECTION VIII - Special Protection Information**

Respiratory Protection: NIOSH/MSHA approved respirator. Mechanical: Where dusts or mists are generated. Protective Gloves: Rubber or neoprene gloves. Eye protection: Chemical goggles. Other Protective Clothing: Standard work clothing. Wash articles before reuse.

**SECTION IX - Spill or Leak Procedure**

Steps to Be Taken if Spilled or Released: Contain spill. Absorb liquids with inert material, sweep up and place in a container. Material may be slippery. Waste Disposal Methods: Dispose of according to all local, state and federal regulations. Rinse container before discarding.

**SECTION X - Storage and Handling Information**

Protect from freezing. Keep container closed when not in use. Do not reuse container.

# Set-Up Instructions

## READ THIS FIRST

Thank you for purchasing Canon imageCLASS MF5750.

To get your machine ready for use, please follow the instructions in this document before referring to any other documentation.

# 1

## Unpack the machine and its components.

Check that you have the following:

• Machine

• Cartridge

• Cassette extension

• Extension cover

- Power cord
- USB cable
- Telephone line cord
- Destination labels
- Set-Up Instructions

- Basic Guide
- Facsimile Guide
- Warranty
- Limited Warranty Note for Cartridge X25
- Registration Card
- MF5700 Series User Software CD-ROM

### NOTE

- The cartridge included with the machine is Cartridge X25 that yields approximately 2,500 pages of printouts (Letter at 4% dot coverage).

## Before setting up the machine:

- 1 Place the machine on a flat, stable surface.
- 2 Remove **all** shipping tape from the **exterior** of the machine.

Referring to the following figure, remove the tape and spacers on both sides of the cassette housed in the machine.

# Material Safety Data Sheet

**Section 1—Chemical Product and Company Identification.** *Product Identifiers:* TC-5000. *Product Use:* Road stripe compound deplasticizer. *Manufacturer:* Montgomery Manufacturing Co., 118 Industrial Ct., Kennedale TX 76060. *Emergency Contact:* InfoTrac, +1 352-323-3500 (international), 800-535-5053 (toll free US and Canada). *Date MSDS Prepared:* 4/12/2007. *MSDS Prepared by:* Edward McGuire. *Phone Number:* +1 817-478-3221 (international), 800-234-0088 (toll free US and Canada).

## **Section 2—Composition/Information on Ingredients.**

*Ingredient Name* ..... % ..... *CAS Number* .. *LD<sub>50</sub> of Ingredient* ..... *LC<sub>50</sub> of Ingredient*  
proprietary information (trade secret)

**Section 3—Hazards Identification.** *Route of Entry:* Skin Contact, Eye Contact, Ingestion, Inhalation. *Emergency Overview:* Appearance: clear, colorless liquid. May irritate eyes. When mists are generated, inhaled mists may irritate respiratory system. *Potential Health Effects:* Skin: prolonged and/or repeated contact may cause irritation and redness. Eyes: contact may cause irritation. Ingestion: large amounts may cause irritation of intestinal tract, nausea, and diarrhea. Inhalation: inhalation of mists may irritate respiratory system.

**Section 4—First Aid Measures.** *Skin Contact:* Wash thoroughly with soap and water. Remove contaminated clothing. If irritation persists, seek medical attention. *Eye Contact:* Immediately hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. If irritation persists, seek medical attention. *Ingestion:* Do not induce vomiting. If irritation persists, or if a large amount is ingested, seek medical attention. *Inhalation (mists):* Get to fresh air and provide respiratory assistance if necessary. If symptoms persist, seek medical attention.

**Section 5—Fire Fighting Measures.** *Flammability:* Nonflammable. Slight fire hazard. *Means of Extinction:* use media suitable to surrounding fire. *Flashpoint (°C) and Method:* primary ingredient: 75 [167°F], PMCC. *Upper Flammable Limit:* N/D. *Lower Flammable Limit:* N/D. *Autoignition Temperature:* N/D. *Explosion Data—Sensitivity to Impact:* none. *Hazardous Combustion Products:* N/D.

**Section 6—Accidental Release Measures.** *Leak and Spill Procedures:* Contain spill. Absorb liquid with inert material. Sweep up and place in a container. Surfaces may become slippery.

**Section 7—Handling and Storage.** *Handling Procedures and Equipment:* Avoid contact with skin and eyes. Rinse skin thoroughly after handling. *Storage Requirements:* Do not handle or store near an open flame, heat, or other sources of ignition. Prevent electrostatic charge buildup by using common bonding and grounding techniques. Keep out of reach of children. Keep container closed when not in use. Product may solidify or separate below room temperature.

**Section 8—Exposure Control/Personal Protection.** *Exposure Limits:* N/D. *Specific Engineering Controls:* use local exhaust ventilation if necessary. *Personal Protective Equipment:* Eyes: chemical goggles; face shield if splashing is possible. Skin: normal protective clothing; impervious gloves. Respiratory: If operator will be exposed to concentrated mist or vapor or if irritation is experienced, NIOSH approved respirator for organic vapors.

**Section 9—Physical and Chemical Properties.** *Physical State:* liquid (room temperature). *Odor and Appearance:* clear, colorless liquid, sweet solvent odor. *Odor Threshold (ppm):* N/D. *Specific Gravity:* est. 0.87. *Vapor Density (air=1):* est. heavier than air. *Vapor Pressure (mmHg):* N/D. *Evaporation Rate:* est. slower than ethyl ether. *Boiling Point (°C):* est. >100 [>212°F]. *Freezing Point (°C):* est. -30 [-22°F]. *pH:* N/A. *Coefficient of Water/Oil Distribution:* N/D. *Solubility in Water:* insoluble.

**Section 10—Stability and Reactivity.** *Chemical Stability:* yes. *Incompatibility with Other Substances:* Strong alkalies and oxidizing agents. *Hazardous Decomposition Products:* methanol may be evolved if hydrolyzed or saponified.

**Section 11—Toxicological Information.** *Effects of Acute Exposure:* Skin: irritation. Eye: irritation. Gastrointestinal tract: irritation. Inhalation: Irritation of respiratory system. *Effects of Chronic Exposure:* N/D. *Irritancy of Product:* N/D. *Skin Sensitization:* N/D. *Respiratory Sensitization:* N/D. *Carcinogenicity—IARC:* none. *ACGIH:* none. *Reproductive Toxicity:* N/D. *Teratogenicity:* N/D. *Embryotoxicity:* N/D. *Mutagenicity:* N/D. *Name of Synergistic Products/Effects:* N/D.

**Section 12—Ecological Information.** *Aquatic Toxicity:* N/D.

**Section 13—Disposal Considerations.** *Waste Disposal:* Dispose of in accordance with all state, local, and federal regulations. Rinse empty container. Do not reuse container.

**Section 14—Transport Information.** *Special Shipping Information:* USDOT/IMDG proper shipping name: "Cleaning compounds, n.o.i.". *Label:* none. *Placards:* none.

**Section 15—Regulatory Information.** *OSHA:* This material is subject to the requirements of the OSHA Hazard Communication Rule. *International Regulations:* N/D.

**Section 16—Other Information.** *Suggested NFPA rating:* H=1, F=2, I=0, S=none. *Suggested HMIS rating:* H=1, F=2, P=0, PPE=N/D. NPCA recommends that PPE codes be determined by the employer, who is most familiar with the actual conditions under which chemicals are used at the work location. This information is prepared according to 29 CFR 1910.1200 and is based on typical working conditions, use of product according to label directions, and the works of others. It may not be accurate. Actual use conditions are beyond our control. Employers should make their own studies to determine the suitability of the information for their purposes. Users assume all risks of use, handling, and disposal of the product, or of publishing, use, or reliance upon, this information. We assume no liability for any claims, losses, or damages of any third party or for lost profits or any special, indirect, incidental, consequential or exemplary damages, howsoever arising, even if we have been advised of the possibility of such damages.

*the right cleaner ... exactly right!*

**1030**

**TC 5000**  
Paint and Thermoplast Remover

FOR INDUSTRIAL  
AND INSTITUTIONAL USE ONLY  
KEEP OUT OF REACH OF CHILDREN  
NET CONTENTS: 1 US GALLON

**TC 5000** softens thermoplast, rubberized paints, and latexes, and cleans up with plain water.

Use to remove dried road marking paint from trucks and portable spraying equipment, paint pots,

**TC 5000** is a responsible choice. Its scientifically designed formula uses renewable ingredients. It is biodegradable and safe to handle.

#### **DIRECTIONS**

Apply to dried marking paint on equipment by spray or brush. Stop when runoff or puddling begin to occur. Allow to soak. Reapply if necessary to keep wet. When soft, remove coating with power washer or brush. Heavy or ancient deposits may require repeated treatment.

For a cleaner rinse, or to reduce the amount of rinse water necessary, add an all-purpose detergent concentrate—such as **Fury, Centu-**

**tion, or Multi Kleen**—to the rinse water.

#### **CAUTIONS / FIRST AID**

- **Ingestion:** may irritate gastrointestinal tract. If swallowed, dilute with 2 glasses of water. Do not induce vomiting. Seek medical attention.
  - **Eye contact:** may irritate eyes. In case of eye irritation, flush with water for 15 minutes.
  - **Skin contact:** may irritate skin. In case of skin contact, remove contaminated clothing and wash with soap and water.
  - **Inhalation (vapors/mists):** When used according to label directions, poses no significant health hazard. In case of irritation of respiratory system or difficulty breathing, get to fresh air and provide respiratory assistance if necessary.
- If symptoms persist, seek medical attention.

City  
and  
State

Office

(2) Have the samples analyzed in accordance with 40 CFR Part 136 for the noncompliant parameters listed (see above).

(3) Submit the laboratory reports and chain of custody forms to our office within forty-five (45) days from the date of this notice of violation.

#### REQUIREMENTS FOR LAB REPORTS AND CHAIN OF CUSTODY FORMS

##### **DO NOT ALLOW YOUR LABORATORY TO USE SOLID WASTE ANALYTICAL METHODS**

1. THE CORRECT SAMPLE POINT NUMBER MUST BE PROVIDED ON THE CHAIN OF CUSTODY FORM.
2. THE PERSON'S NAME THAT COLLECTED THE SAMPLE MUST BE ON THE CHAIN OF CUSTODY FORM. AS THE SAMPLER. IT MUST BE CLEAR AS TO WHO COLLECTED THE WASTEWATER SAMPLE.
3. THE PERSON THAT COLLECTED THE SAMPLE MUST ALSO BE THE PERSON THAT SIGNS THE CHAIN OF CUSTODY FORM TO RELINQUISH THE SAMPLE. INITIALS ARE NOT ACCEPTABLE. A SIGNATURE IS REQUIRED TO SHOW WHO RELINQUISHED AND WHO ACCEPTED THE SAMPLE.
4. THE CHAIN OF CUSTODY MUST BE COMPLETE ~ SIGNATURES ARE REQUIRED (no typewritten names or initials) ~ DATES AND TIMES ARE REQUIRED.
5. THE CORRECT ANALYTICAL METHODS MUST BE USED. THE ONLY ACCEPTABLE ANALYTICAL METHODS FOR WASTEWATER ANALYSES ARE PROVIDED IN 40 CFR PART 136.
6. THE CHEMICAL PRESERVATIVES THAT WERE USED FOR EACH SAMPLE MUST BE RECORDED ON ALL CHAIN OF CUSTODY FORMS. REFRIGERATION ALSO MUST BE INDICATED FOR ALL SAMPLES.
7. THE SAMPLE TYPE (composite or grab) MUST BE RECORDED ON THE CHAIN OF CUSTODY.
8. FOR EACH **COMPOSITE** SAMPLE: THE SAMPLE BEGIN DATE AND END DATE MUST BE RECORDED. ALSO THE SAMPLE BEGIN TIME AND END TIME MUST BE RECORDED.
9. FOR EACH GRAB SAMPLE: THE SAMPLE DATE AND TIME MUST BE RECORDED.

**RESAMPLING WILL BE REQUIRED FOR FAILURE TO MEET THE REQUIREMENTS LISTED IN NUMBERS 1 THROUGH 9 (above).**

##### **If any of the following conditions exist the report will be returned for correction:**

- THE METHOD DETECTION LIMIT WAS NOT PROVIDED ON THE LABORATORY REPORT.
- THE DATE THE SAMPLE WAS ANALYZED WAS NOT PROVIDED ON THE LABORATORY REPORT.
- THE NAME OF THE PERSON PERFORMING THE ANALYSES WAS NOT ON THE LABORATORY REPORT.
- THE LABORATORY REPORT WAS NOT SIGNED BY A LAB MANAGER OR OTHER LAB EMPLOYEE.
- THE PERSON THAT RELINQUISHED THE SAMPLE OR ACCEPTED THE SAMPLE USED THEIR INITIALS ON THE CHAIN OF CUSTODY FORM – A SIGNATURE IS REQUIRED.

Should you have any questions concerning this matter please call Charles Graham at (281) 575-2834.

HSE MANAGER  
KARL GUIDRY  
CES ENVIRONMENTAL SERVICES, INC.  
4904 GRIGGS ROAD  
HOUSTON, TX 77021

Dear Mr. Guidry:

This notice of violation (NOV) requires the collection of wastewater samples.

DO NOT ALLOW YOUR ANALYTICAL LABORATORY TO USE ANALYTICAL METHODS THAT ARE NOT LISTED IN 40 CFR PART 136. SOLID WASTE METHODS ARE NOT ACCEPTABLE FOR THE ANALYSES OF WASTEWATER SAMPLES. If your wastewater samples are not collected, handled, and analyzed in accordance with the REQUIREMENTS FOR LAB REPORTS AND CHAIN OF CUSTODY FORMS, provided in this NOV, your firm will be required to collect additional samples and repeat the analyses.

The City of Houston Industrial Wastewater Service recently sampled your firm's industrial discharge to the City's sanitary sewer and found the following sample result does not comply with the limit established in Industrial Waste Permit No. 6806, in accordance with Chapter 47; Article V.:

**NOTE: If more than one discharge limit is listed compliance with the lowest limit is required.**

Date	Parameter	Concentration (mg/L)	Discharge Limit (mg/L)
9-23-2008	Oil and Grease	406	400 (City grab)

Therefore, your firm is required to perform self-monitoring to demonstrate compliance. The self-monitoring must be performed in the following manner:

(1) Contact a private analytical laboratory to collect three (3) GRAB samples on three (3) different days (one sample per day). The samples must be collected at sample point No. one (1) (refer to page two of your permit for sample point location). Representative samples of your firm's industrial discharge should be collected during normal operating hours and handled in accordance with 40 CFR Part 136.

Permit # 6806

Dear Mr. Thangudu:

This notice of violation (NOV) requires the collection of wastewater samples.

DO NOT ALLOW YOUR ANALYTICAL LABORATORY TO USE ANALYTICAL METHODS THAT ARE NOT LISTED IN 40 CFR PART 136. SOLID WASTE METHODS ARE NOT ACCEPTABLE FOR THE ANALYSES OF WASTEWATER SAMPLES. If your wastewater samples are not collected, handled, and analyzed in accordance with the REQUIREMENTS FOR LAB REPORTS AND CHAIN OF CUSTODY FORMS, provided in this NOV, your firm will be required to collect additional samples and repeat the analyses.

The City of Houston Industrial Wastewater Service recently sampled your firm's industrial discharge to the City's sanitary sewer. The following sample result does not comply with the limits established in Industrial Waste Permit No. 6806, in accordance with Chapter 47; Article V.:

Date	pH	pH Discharge Limit
10/13/2008	13.00	5.00 - 11.00

In order to demonstrate compliance with the pH discharge limit, firm is required to perform self-monitoring. The self-monitoring must be performed in the following manner:

Contact an analytical laboratory to collect three (3) grab samples on three (3) different days (one sample per day). The samples must be collected at SAMPLE POINT NO. one (1) (refer to page two of your firm's permit for the location of sample point number one). All samples must be collected during a peak discharge period. The pH of each sample must be measured with a pH meter at the exact time of collection.

Council Members: Toni Lawrence Jarvis Johnson Anne Clutterbuck Wanda Adams Mike Sullivan M.J. Khan, P.E. Pam Holm Adrian Garcia  
James G. Rodriguez Peter Brown Sue Lovell Ronald C. Green Jolanda "Jo" Jones Melissa Noriega Controller: Annise D. Parker

EPAHO019001829

Also please review the following requirements:

- Submit the laboratory reports and chain of custody forms to this office within **fifteen (15) days** from the date of this letter.
- The laboratory report must indicate THE TIME THE pH ANALYSES WAS PERFORMED ON EACH SAMPLE.

**REQUIREMENTS FOR LAB REPORTS AND CHAIN OF CUSTODY FORMS**

**DO NOT ALLOW YOUR LABORATORY TO USE SOLID WASTE ANALYTICAL METHODS**

1. THE CORRECT SAMPLE POINT NUMBER MUST BE PROVIDED ON THE CHAIN OF CUSTODY FORM.
2. THE PERSON'S NAME THAT COLLECTED THE SAMPLE MUST BE ON THE CHAIN OF CUSTODY FORM AS THE SAMPLER. IT MUST BE CLEAR AS TO WHO COLLECTED THE WASTEWATER SAMPLE.
3. THE PERSON THAT COLLECTED THE SAMPLE MUST ALSO BE THE PERSON THAT SIGNS THE CHAIN OF CUSTODY FORM TO RELINQUISH THE SAMPLE. INITIALS ARE NOT ACCEPTABLE. A SIGNATURE IS REQUIRED TO SHOW WHO RELINQUISHED AND WHO ACCEPTED THE SAMPLE.
4. THE CHAIN OF CUSTODY MUST BE COMPLETE ~ SIGNATURES ARE REQUIRED (no typewritten names or initials) ~ DATES AND TIMES ARE REQUIRED.
5. THE CORRECT ANALYTICAL METHODS MUST BE USED. THE ONLY ACCEPTABLE ANALYTICAL METHODS FOR WASTEWATER ANALYSES ARE PROVIDED IN 40 CFR PART 136.
6. THE CHEMICAL PRESERVATIVES THAT WERE USED FOR EACH SAMPLE MUST BE RECORDED ON ALL CHAIN OF CUSTODY FORMS. REFRIGERATION ALSO MUST BE INDICATED FOR ALL SAMPLES.
7. THE SAMPLE TYPE (composite or grab) MUST BE RECORDED ON THE CHAIN OF CUSTODY.
8. FOR EACH **COMPOSITE** SAMPLE: THE SAMPLE BEGIN DATE AND END DATE MUST BE RECORDED. ALSO THE SAMPLE BEGIN TIME AND END TIME MUST BE RECORDED.
9. FOR EACH GRAB SAMPLE: THE SAMPLE DATE AND TIME MUST BE RECORDED.

**RESAMPLING WILL BE REQUIRED FOR FAILURE TO MEET THE REQUIREMENTS LISTED IN NUMBERS 1 THROUGH 9 (above).**

**If any of the following conditions exist the report will be returned for correction:**

- THE METHOD DETECTION LIMIT WAS NOT PROVIDED ON THE LABORATORY REPORT.
- THE DATE THE SAMPLE WAS ANALYZED WAS NOT PROVIDED ON THE LABORATORY REPORT.
- THE NAME OF THE PERSON PERFORMING THE ANALYSES WAS NOT ON THE LABORATORY REPORT.
- THE LABORATORY REPORT WAS NOT SIGNED BY A LAB MANAGER OR OTHER LAB EMPLOYEE.
- THE PERSON THAT RELINQUISHED THE SAMPLE OR ACCEPTED THE SAMPLE USED THEIR INITIALS ON THE CHAIN OF CUSTODY FORM – A SIGNATURE IS REQUIRED.

If you have any questions concerning this matter please call Charles Graham at (281) 575-2834.

Sincerely,

Clyde Smith

#### 2) FC 102.2.1 - Existing buildings

Buildings or structures in existence at the time of the passage of this code may have their existing use or occupancy continued if the buildings or structures comply with the standards established in Article IX of Chapter 10 of the City Code, Section 102.6 and Chapter 34 of the Building Code and Appendix "L" of the Building Code (Life Safety Requirements for Existing Buildings). Determination of compliance shall be under the primary jurisdiction of the building official. Whenever the code official determine, pursuant to inspection of such a building or structure, that there exists therein a fire hazard that causes the building or structure to be dangerous to life, the code official shall initiate proceedings under Article VIII of Chapter 10 of the City Code, including the placarding of buildings as authorized therein. The code official shall notify the building official, and if the building official determines that the building or structure constitutes a dangerous building as defined in Article IX of Chapter 10 of the City Code, then the building official shall initiate dangerous building abatement proceedings before the hearing official or the Building and

## &lt;&lt; NOTICE OF VIOLATION CONTINUED &gt;&gt;

Standards Commission under the applicable provisions of Chapter 10 of the City Code.

## COMMENTS:

EQUIPMENT HAS BEEN RED TAGGED BY THE FIRE MARSHAL'S OFFICE. UNTIL A TECHNICAL REPORT HAS BEEN PERFORMED BY A QUALIFIED INDIVIDUAL AND SUBMITTED TO THE OFFICIAL HAVING JURISDICTION, THE EQUIPMENT SHALL NOT BE OPERATED IN ANY MANNER. ALL OPERATIONS, EQUIPMENT, PROCESSES AND REPAIRS SHALL REMAIN SUSPENDED UNTIL SUCH TIME THAT A TECHNICAL REPORT HAS BEEN PROVIDED THAT SATISFACTORILY DEMONSTRATES COMPLIANCE WITH APPLICABLE STANDARDS AND CODES AND PROVIDES EVIDENCE OF PROPER PRECAUTIONS BEING UNDERTAKEN.

\*\*\*COMPLIANCE WITHIN 30 DAYS\*\*\*

Status \_\_\_\_\_ Date \_\_\_\_\_ Inspector's ILMS-ID \_\_\_\_\_

## 3) FC 104.7.2 - Technical assistance

To determine the acceptability of technologies, processes, products, facilities, materials and uses attending the design, operation or use of a building or premises subject to the inspection of the department, the code official is authorized to require the owner or agent to provide, without charge to the jurisdiction, a technical opinion and report. The opinion and report shall be prepared by a qualified engineer, specialist, laboratory or fire safety specialty organization acceptable to the code official and shall analyze the fire safety properties of the design, operation or use of the building or premises and the facilities and appurtenances situated thereon, to recommend necessary changes. The code official is authorized to require design submittals to be prepared by, and bear the stamp of, a registered design professional.

## COMMENTS:

A TECHNICAL REPORT, CONCERNING THE THERMAL OXIDIZING PROCESS, SHALL BE SUBMITTED TO THE AHJ. THE REPORT SHALL BE PERFORMED BY A QUALIFIED INDIVIDUAL, PREFERABLY A FIRE PROTECTION ENGINEER. IF CES ENVIRONMENTAL CHOOSES TO CEASE THE OPERATION, AN ACTION PLAN SHALL BE SUBMITTED TO THE AHJ. THE PLANS SHALL GIVE SPECIFIC TIME FRAMES OF WHEN AND WHERE IT WILL BE MOVED.

\*\*\*COMPLIANCE WITHIN 30 DAYS\*\*\*

Status \_\_\_\_\_ Date \_\_\_\_\_ Inspector's ILMS-ID \_\_\_\_\_

## 4) FC 2701.4.2 - Hazardous Materials Inventory Statement (HMIS)

Where required by the code official, an application for a permit shall include a HMIS, such as SARA Title III, Tier II Report, or other approved statement. The HMIS shall include the following information: 1.

Report : ILMS911

Printed: 18-DEC-2008 11:42:28

## &lt;&lt; NOTICE OF VIOLATION CONTINUED &gt;&gt;

Manufacturer's name. 2. Chemical name, trade names, hazardous ingredients. 3. Hazard classification. 4. MSDS or equivalent. 5. United Nations (UN), North America (NA) or the Chemical Abstract Service (CAS) identification number. 6. Maximum quantity stored or used on-site at one time. 7. Storage conditions related to the storage type, temperature and pressure.

## COMMENTS:

A HAZARDOUS MATERIAL INVENTORY STATEMENT SHALL BE SUBMITTED TO THE AUTHORITY HAVING JURISDICTION.

OUTSIDE STORAGE AREA FOR HAZARDOUS MATERIALS WAS NOT ROUTED TO THE FIRE MARSHAL'S OFFICE ROUTE #180 FOR REVIEW BY HAZARDOUS MATERIAL/HIGH-PILE INSPECTORS. PLANS MUST BE SUBMITTED TO COMMERCIAL PLANS CHECKING SECTION AND ROUTED TO FM 180 FOR PROPER REVIEW. THIS INCLUDES 4 SETS OF PLANS, 2 SETS WILL BE GIVEN TO THE BUILDING DEPARTMENT AND 2 SETS TO FM 180. YOU MAY SUBMIT THE PLANS AT 3300 MAIN STREET.

\*\*\*COMPLIANCE WITHIN 30 DAYS\*\*\*

Status \_\_\_\_\_ Date \_\_\_\_\_ Inspector's ILMS-ID \_\_\_\_\_

## 5) FC 105.8.2 - INFORMATION FOR COMPLIANCE.

Violations not corrected by the re-inspection date will subject the owner, operator, lessee, to a re-inspection fee of \$150.00 for each additional inspection, as well as disapproval of permits, issuance of citations for uncorrected violations, and citations for invalid permits, and require the resubmittal of application fees for such permits.

Failure on your part to comply with the indicated violations will subject you to the penalties prescribed by law for such violations. A follow-up inspection will be made on or after:

Inspecting Officer Signature	_____	Date	_____
Copy Received By Signature	_____	Date	_____
Scheduled Reinspection Date	_____	Reinspection Date	_____ R9 _____
Scheduled Reinspection Date	_____	Reinspection Date	_____ R9 _____
Scheduled Reinspection Date	_____	Reinspection Date	_____ R9 _____

**2701.4.1 Hazardous Materials Management Plan.** Where required by the code official, each application for a permit shall include a Hazardous Materials Management Plan (HMMP). The HMMP shall include a facility site plan designating the following:

1. Storage and use areas.
2. Maximum amount of each material stored or used in each area.
3. Range of container sizes.
4. Locations of emergency isolation and mitigation valves and devices.
5. Product conveying piping containing liquids or gases, other than utility-owned fuel gas lines and low-pressure fuel gas lines.
6. On and off positions of valves for valves that are of the self-indicating type.
7. Storage plan showing the intended storage arrangement, including the location and dimensions of aisles.
8. The location and type of emergency equipment.

The plans shall be legible and drawn approximately to scale. Separate distribution systems are allowed to be shown on separate pages.

**2701.4.2 Hazardous Materials Inventory Statement (HMIS).** Where required by the code official, an application for a permit shall include a HMIS, such as SARA Title III, Tier II Report, or other approved statement. The HMIS shall include the following information:

1. Manufacturer's name.
2. Chemical name, trade names, hazardous ingredients.
3. Hazard classification.
4. MSDS or equivalent.
5. United Nations (UN), North America (NA) or the Chemical Abstract Service (CAS) identification number.
6. Maximum quantity stored or used on-site at one time.
7. Storage conditions related to the storage type, temperature and pressure.

**2701.5 Facility closure.** Facilities shall be placed out of service in accordance with Sections 2701.5.1 through 2701.5.3.

**2701.5.1 Temporarily out-of-service facilities.** Facilities which are temporarily out of service shall continue to maintain a permit and be monitored and inspected.

**2701.5.2 Permanently out-of-service facilities.** Facilities for which a permit is not kept current or is not monitored and inspected on a regular basis shall be deemed to be permanently out of service and shall be closed in an approved manner. When required by the code official, permittees shall apply for approval to close permanently storage, use or handling facilities. The code official is authorized to require that such application be accompanied by an approved facility closure plan in accordance with Section 2701.5.3.

**2701.5.3 Facility closure plan.** When a facility closure plan is required in accordance with Section 2701.4 to terminate storage, dispensing, handling or use of hazardous materials, it shall be submitted to the code official at least 30 days prior to facility closure. The plan shall demonstrate that hazardous materials which are stored, dispensed, handled or used in the facility will be transported, disposed of or reused in a manner that eliminates the need for further maintenance and any threat to public health and safety.

## SECTION 2702 DEFINITIONS

**2702.1 Definitions.** The following words and terms shall, for the purposes of this chapter, Chapters 28 through 44, and as used elsewhere in this code, have the meanings shown herein.

**BOILING POINT.** The temperature at which the vapor pressure of a liquid equals the atmospheric pressure of 14.7 pounds per square inch (psia) (101 kPa) or 760 mm of mercury. Where an accurate boiling point is unavailable for the material in question, or for mixtures which do not have a constant boiling point, for the purposes of this classification, the 20-percent evaporated point of a distillation performed in accordance with ASTM D 86 shall be used as the boiling point of the liquid.

**CEILING LIMIT.** The maximum concentration of an airborne contaminant to which one may be exposed as published in DOL 29 CFR Part 1910.1000.

**CHEMICAL.** An element, chemical compound or mixture of elements or compounds or both.

**CHEMICAL NAME.** The scientific designation of a chemical in accordance with the nomenclature system developed by the International Union of Pure and Applied Chemistry, the Chemical Abstracts Service rules of nomenclature, or a name which will clearly identify a chemical for the purpose of conducting an evaluation.

**CLOSED CONTAINER.** A container sealed by means of a lid or other device such that liquid, vapor or dusts will not escape from it under ordinary conditions of use or handling.

**CONTAINER.** A vessel of 60 gallons (227 L) or less in capacity used for transporting or storing hazardous materials. Pipes, piping systems, engines and engine fuel tanks are not considered to be containers.

**CONTROL AREA.** Spaces within a building which are enclosed and bounded by exterior walls, fire walls, fire barriers and roofs, or a combination thereof, where quantities of hazardous materials not exceeding the maximum allowable quantities per control area are stored, dispensed, used or handled.

**CYLINDER.** A pressure vessel designed for pressures higher than 40 psia (275.6 kPa) and having a circular cross section. It does not include a portable tank, multi-unit tank car tank, cargo tank or tank car.

**DEFLAGRATION.** An exothermic reaction, such as the extremely rapid oxidation of a flammable dust or vapor in air, in which the reaction progresses through the unburned material at

## CERTIFIED MAIL-RETURN RECEIPT REQUESTED

Dear Mr. Thangudu:

This notice of violation (NOV) requires the collection of wastewater samples.

**DO NOT ALLOW YOUR ANALYTICAL LABORATORY TO USE ANALYTICAL METHODS THAT ARE NOT LISTED IN 40 CFR PART 136. SOLID WASTE METHODS ARE NOT ACCEPTABLE FOR THE ANALYSES OF WASTEWATER SAMPLES.** If your wastewater samples are not collected, handled, and analyzed in accordance with the REQUIREMENTS FOR LAB REPORTS AND CHAIN OF CUSTODY FORMS, provided in this NOV, your firm will be required to collect additional samples and repeat the analyses.

The City of Houston Industrial Wastewater Service recently sampled your firm's industrial discharge to the City's sanitary sewer and found the following sample result(s) does not comply with the limit(s) established in Industrial Waste Permit No. 6806, in accordance with Chapter 47; Article V.:

**NOTE: If more than one discharge limit is listed compliance with the lowest limit is required.**

Date	Parameter	Concentration (mg/L)	Discharge Limit (mg/L)
9-24-2007	Oil & Grease	586	400 (City grab)

Therefore, your firm is required to perform self-monitoring to demonstrate compliance. The self-monitoring must be performed in the following manner:

(1) Contact a private analytical laboratory to collect three (3) GRAB samples on three (3) different days (one sample per day). The samples must be collected at sample point No. one (1) (refer to page two of your permit for sample point location). Representative samples of your firm's industrial discharge should be collected during normal operating hours and handled in accordance with 40 CFR Part 136.

(2) Have the samples analyzed in accordance with 40 CFR Part 136 for the noncompliant parameters listed (see above).

Council Members: Toni Lawrence Jarvis Johnson Anne Clutterbuck Ada Edwards Addie Wiseman M.J. Khan, P.E. Pam Holm Adrian Garcia  
Carol Alvarado Peter Brown Sue Lovell Ronald C. Green Michael Berry Melissa Noriega Controller: Annise D. Parker

EPAHO019001835

(3) Submit the laboratory reports and chain of custody forms to our office within forty-five (45) days from the date of this notice of violation.

REQUIREMENTS FOR LAB REPORTS AND CHAIN OF CUSTODY FORMS

**DO NOT ALLOW YOUR LABORATORY TO USE SOLID WASTE ANALYTICAL METHODS**

1. THE CORRECT SAMPLE POINT NUMBER MUST BE PROVIDED ON THE CHAIN OF CUSTODY.
2. THE PERSON'S NAME THAT COLLECTED THE SAMPLE (THE SAMPLER MUST BE ON THE CHAIN OF CUSTODY FORM.
3. THE PERSON THAT COLLECTED THE SAMPLE MUST ALSO BE THE PERSON THAT SIGNS THE CHAIN OF CUSTODY FORM TO RELINQUISH THE SAMPLE. INITIALS ARE NOT ACCEPTABLE A SIGNATURE IS REQUIRED.
4. THE CHAIN OF CUSTODY MUST BE COMPLETE ~ SIGNATURES ARE REQUIRED (no typewritten names or initials) ~ DATES AND TIMES ARE REQUIRED.
5. THE CORRECT ANALYTICAL METHODS MUST BE USED. THE ONLY ACCEPTABLE ANALYTICAL METHODS FOR WASTEWATER ANALYSES ARE PROVIDED IN 40 CFR PART 136.
6. THE SAMPLE PRESERVATIVES (CHEMICAL PRESERVATIVES AND REFRIGERATION) MUST BE RECORDED ON ALL CHAIN OF CUSTODY FORMS.
7. THE SAMPLE TYPE (composite or grab) MUST BE RECORDED ON THE CHAIN OF CUSTODY.
8. FOR EACH **COMPOSITE** SAMPLE: THE SAMPLE BEGIN DATE AND END DATE MUST BE RECORDED. ALSO THE SAMPLE BEGIN TIME AND END TIME MUST BE RECORDED.
9. FOR EACH GRAB SAMPLE: THE SAMPLE DATE AND TIME MUST BE RECORDED.

If any of the following conditions exist on a laboratory report, the report will be returned for correction:

- THE METHOD DETECTION LIMITS WERE NOT PROVIDED FOR EACH PARAMETER THAT WAS ANALYZED.
- THE DATE THE SAMPLE WAS ANALYZED WAS NOT PROVIDED ON THE ANALYTICAL LABORATORY REPORT.
- THE NAME OF THE PERSON THAT PERFORMED THE ANALYSES WAS NOT ON THE LABORATORY REPORT.
- THE METHOD DETECTION LIMITS MUST BE PROVIDED FOR EACH PARAMETER THAT WAS ANALYZED.
- THE LABORATORY REPORT WAS NOT SIGNED BY A LAB MANAGER OR OTHER LAB EMPLOYEE.
- THE PERSON THAT RELINQUISHED THE SAMPLE OR ACCEPTED THE SAMPLE USED THEIR INITIALS ON THE CHAIN OF CUSTODY FORM – A SIGNATURE IS REQUIRED.
- THE LABORATORY REPORT MUST BE SIGNED.

Should you have any questions concerning this matter please call Charles Graham at (281) 575-2834

Sincerely,

Clyde Smith

## **Certification Requirement**

**The Certification Statement enclosed with this correspondence must be signed by an employee that is **AUTHORIZED** to sign reports and certifications. Please call 281-575-2833 if there are any questions about who is authorized to sign the Certification Statement.**

Return the Certification Statement with the laboratory reports for the self-monitoring that is required in this correspondence.

Refer to permit Endorsement SM for information about this certification requirement.

This certification is required to be submitted to the City of Houston in response to a notice of violation (NOV) or other enforcement document that requires self-monitoring.

Industrial Waste Permit Number: 6806

**Reference NOV Dated: 10/30/2007**

**CERTIFICATION STATEMENT**

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

CERTIFIED MAIL# 7007 0710 0001 3590 2530  
RETURN RECEIPT REQUESTED

Mr. Karl Guidry  
HSE Manager  
CES Environmental Services, Inc.  
4904 Griggs Road  
Houston Texas, 77021

Re: Information Request

Mr. Guidry –

Per our visit on Thursday, December 13, 2007, the City of Houston Bureau of Air Quality Control (BAQC) requests that you provide us a list of improvements, procedure changes, etc. that CES plans to implement to mitigate the odor issues originating from this facility. We also request that you provide a timeline for estimated completion of each improvement you plan to implement. Specifically, in addition to the aforementioned information, the BAQC would like to know:

Waste Oil Recovery Area

- How many tanks are installed?
- What are the installation dates for each tank?
- What is the capacity of each tank?
- What are the emissions from each tank?
- Under what permit or permit by rule are the tanks authorized and did you update your former permit by rule when these tanks were added?

Centrifuge

- What is the date the centrifuge was installed?
- What are the emissions from the centrifuge?
- Under what permit or permit by rule is the centrifuge authorized?

It is imperative that CES is actively working to expediently resolve this issue. As I informed you on December 13, 1007, the BAQC would like to work with CES to resolve the odor problem and we recognize that CES needs time to remediate these issues. Given that you have been receptive and cooperative with us in the past, we will allow CES a 60-day time period to resolve the odor issues. During this 60-day time period the BAQC will temporarily suspend issuing citations with respect to nuisance odors as long as we feel that you are actively working on solving the problem. This 60-day time period will expire February 21, 2007. The BAQC has a responsibility to respond to citizen complaints and we will continue to do so. During the 60-day time period the BAQC will continue to investigate odor complaints against CES. If we confirm a nuisance condition, we will issue CES a Notice of Violation (NOV) to document the event; however, the NOV is not associated with a fine. **Please be reminded that this agreement is contingent upon evidence that CES is moving forward actively with odor control measures.**

As noted above, please provide the BAQC with documentation regarding the improvements CES intends to pursue along with a timeline for such activity to be complete. Also, provide a response to the specific questions above regarding the waste oil recovery area and centrifuge. Thank you for meeting with us on December 13, 2007 and for the facility tour. If you have any questions regarding this information request please contact either Jennie Brixey (713) 640-4229 or Syed Moinuddin (713) 640-4233. Please respond to this request as soon as possible.

Sincerely,

Jennie Brixey, Environmental Investigator  
Bureau of Air Quality Control

In the event of a boiler accident, the following is provided to ensure timely reporting of any boiler incident:

## Boiler Rules

### 65.50 (f) Boiler accidents.

(1) In case of a serious accident, such as an explosion, the owner/operator shall immediately notify the chief inspector (notification information provided below) and authorized inspector. Neither the boiler nor any of the parts thereof shall be removed or disturbed, except for the purpose of saving human life or preventing further damage, before an inspection and investigation has been made by the chief inspector, deputy inspector, or authorized inspector. The authorized inspector shall notify the chief inspector before beginning an inspection and investigation of serious boiler accidents.

(2) To the extent necessary to conduct an inspection and subsequent investigation of a boiler accident, the owner/operator shall provide the chief inspector or deputy inspector free access to the boiler and accident area. The owner/operator shall provide the chief inspector or deputy inspector and authorized inspector with fragments, parts, appurtenances, documents, and records necessary to conduct an investigation of the accident.

(3) The chief inspector shall investigate, or cause to be investigated, each boiler accident to the extent necessary to reasonably determine the cause of the boiler accident.

65.50 (f) accidentes de Caldera.

(1) en caso de un accidente grave, tal como una explosión, el dueño/operario **notificará** inmediatamente al inspector jefe (información de notificación proporcionó abajo) e inspector autorizado. Ni la caldera ni cualquiera de las partes del mismo se quitará ni será perturbado, menos el propósito de salvar la vida humana ni previniendo aún más daño, antes una inspección e investigación han sido hechas por el inspector jefe, por inspector de diputado, o por inspector autorizado. El inspector autorizado notificará al inspector jefe antes de empezar una inspección y la investigación de accidentes graves de caldera.

(2) hasta el punto necesario para realizar una inspección y la investigación subsiguiente de un accidente de caldera, el dueño/operario proporcionará el inspector de inspector jefe o a diputado liberta el acceso a la área de la caldera y el accidente. El dueño/operario proporcionará el inspector de inspector jefe o diputado y a inspector autorizado con fragmentos, las partes, dependencias, los documentos, y registra necesario para realizar una investigación del accidente.

(3) El inspector jefe investigará, o causará a ser investigado, cada accidente de caldera hasta el punto necesario para determinar razonablemente la causa del accidente de caldera.

Anthony Jones, el Departamento de inspector caldera jefe

# TEXAS DEPARTMENT OF LICENSING AND REGULATION

Compliance Division/BOILER PROGRAM

P.O. Box 12157 Austin, Texas 78711 (512)463-2904 (800)722-7843 FAX (512)463-1376

Email Address: [boilers@license.state.tx.us](mailto:boilers@license.state.tx.us) Internet Address: [www.license.state.tx.us](http://www.license.state.tx.us)

In the event of a boiler accident, the following is provided to ensure timely reporting of any boiler incident:

## Boiler Rules

### 65.50 (f) Boiler accidents.

(1) In case of a serious accident, such as an explosion, the owner/operator shall immediately notify the chief inspector (notification information provided below) and authorized inspector. Neither the boiler nor any of the parts thereof shall be removed or disturbed, except for the purpose of saving human life or preventing further damage, before an inspection and investigation has been made by the chief inspector, deputy inspector, or authorized inspector. The authorized inspector shall notify the chief inspector before beginning an inspection and investigation of serious boiler accidents.

(2) To the extent necessary to conduct an inspection and subsequent investigation of a boiler accident, the owner/operator shall provide the chief inspector or deputy inspector free access to the boiler and accident area. The owner/operator shall provide the chief inspector or deputy inspector and authorized inspector with fragments, parts, appurtenances, documents, and records necessary to conduct an investigation of the accident.

(3) The chief inspector shall investigate, or cause to be investigated, each boiler accident to the extent necessary to reasonably determine the cause of the boiler accident.

Anthony Jones, Chief Boiler Inspector  
Texas Department of Licensing & Regulation  
Compliance Division/ Boiler Program  
P. O. Box 12157  
Austin, Texas 78711  
(512)463-2904 or (800)722-7843

**Post this letter in a conspicuous place  
under glass in the Control Room /Station  
or Manager/Supervisor's Office.**

## Laboratory Analysis Report

Re: Permit Exemption X-15980  
Tank Truck Cleaning Facilities  
Houston, Harris County

Dear Mr. Wylie:

This is in response to your exemption application, Form PI-6, concerning the proposed construction of tank truck cleaning facilities at your Houston Terminal. We understand that volatile organic compound emissions from these facilities will be less than 25 tons per year and that emissions of inorganic compounds will be negligible.

Pursuant to Section 3.27(a) of the Texas Clean Air Act, I have determined to exempt your proposed facilities from the permit procedures of this agency because they will not make a significant contribution of air contaminants to the atmosphere if constructed and operated as described in your application. The conditions set forth in the enclosure labeled "Special Conditions X-15980" are incorporated in and are part of this exemption. You are reminded that regardless of whether a construction permit is required, these facilities must be in compliance with all Rules and Regulations of the Texas Air Control Board at all times.

Celebrating 150 Years of Texas Independence 1836 - 1986

EPAHO019001867

## SPECIAL CONDITIONS

X-15980

1. The cleaning of tank trucks is limited to those trucks with contents on the attached list entitled "Approved Chemical List." Cleaning of tank trucks containing other chemicals is prohibited unless prior approval is obtained from the Executive Director of the Texas Air Control Board, or unless the procedures are followed as described in Attachment I, Review and Notification Requirements for Adding New Materials to the Approved Chemical List.
2. The company shall maintain records containing the following information for these facilities: number of tank trucks cleaned, tank truck contents and the date of cleaning. These records shall be made available to the Executive Director or his designated representative upon request.
3. If the Executive Director determines that odors are occurring from these facilities then the company shall install and maintain carbon adsorbers (or equivalent controls) if the odors are coming from only discrete emission sources, or shall discontinue cleaning tank trucks containing those materials which cause the odors.
4. The caustic cleaning solution pH shall be maintained at or greater than 12.0.

Xylene

Zinc Bromide

- a. The new material has no negative toxicity or odor characteristics, or
- b. The new material is a volatile organic compound, a control device approved by the Executive Director is used to abate any emissions, and the resulting emissions are not greater than the emissions represented in the exemption application.

The holder of this exemption may continue handling the specific materials approved by this procedure as long as the Executive Director does not disapprove the handling of the material. The Executive Director may require a change in the abatement method for a specific material at any time.

## SPECIAL CONDITIONS

X-15980

1. The cleaning of tank trucks is limited to those trucks with contents on the attached list entitled "Approved Chemical List." Cleaning of tank trucks containing other chemicals is prohibited unless prior approval is obtained from the Executive Director of the Texas Air Control Board, or unless the procedures are followed as described in Attachment I, Review and Notification Requirements for Adding New Materials to the Approved Chemical List.
2. The company shall maintain records containing the following information for these facilities: number of tank trucks cleaned, tank truck contents and the date of cleaning. These records shall be made available to the Executive Director or his designated representative upon request.
3. If the Executive Director determines that odors are occurring from these facilities then the company shall install and maintain carbon adsorbers (or equivalent controls) if the odors are coming from only discrete emission sources, or shall discontinue cleaning tank trucks containing those materials which cause the odors.
4. The caustic cleaning solution pH shall be maintained at or greater than 12.0.

## ATTACHMENT I

X-15980

### Review and Notification Requirements for Adding New Materials to the Approved Chemical List

The holder of this exemption may clean trucks handling materials other than those specifically listed in this exemption or approved by the Executive Director of the Texas Air Control Board (TACB) provided the procedure described below is followed.

1. The holder of the exemption shall apply the best available control technology with consideration given to the technical practicability and economic reasonableness of reducing or eliminating the particular emissions. The properties of the new material relating to odor and health effects shall be of primary importance in controlling emissions. Notwithstanding the foregoing, the holder of the exemption shall not cause, suffer, allow or permit emissions of any material which may reasonably be anticipated to cause or contribute to a condition of "air pollution" as defined in the Texas Clean Air Act.
2. At least one day prior to commencing the cleaning operations with a new material, the holder of the exemption shall mail to the Executive Director, to the regional office of the TACB, to the City of Houston Health Department and to the Harris County Pollution Control Department, a certified letter containing the name of the material to be handled and the selected abatement method. Concurrently (or as soon as is practicable), telephone notification shall be made to the City of Houston Health Department, the Harris County Pollution Control Department and the regional office of the TACB that the request is being mailed. The letter shall contain the estimated emissions for the materials vented directly to the atmosphere. Where these uncontrolled emissions are negligible, they need not be quantified, but the basis for determining that they are negligible should be given. The molecular weight, vapor pressure, density or specific gravity, odor characteristics and threshold limit values shall be specified when the emissions are quantifiable. If a notice of denial from the TACB is not received within ten days after receipt of the written request, the cleaning of the new material is authorized.
3. After mailing the certified letter and completing the telephone notification as described in step 2 of this procedure, the holder of this exemption may proceed immediately with handling the new material provided that the material is not listed as a hazardous constituent on Appendix VIII of 40 CFR 261 and that one of the following is true:

Mr. J. C. Wylie

2

May 20, 1985

Thank you for providing the information necessary for our evaluation of your proposal. If you have further questions concerning this exemption, please contact Ms. Karen Neumann of our Permits Division.

Sincerely,

  
Bill Stewart, P.E.  
Executive Director

## Safety Department

April 22, 2008

APR 25 2008

CES Environmental Services  
4904 Griggs Rd  
Houston, TX 77021  
Attn: Tank Wash Manager

Dana Transport has been a participating Partner in the American Chemistry Council's *Responsible Care Partnership Program*, promoting continuous safety, health, environmental, and security performance in the use, distribution, transportation, storage, treatment, and disposal of chemicals.

Dana has been committed to this purpose by aligning its policies and procedures to the *Responsible Care Codes*. While these helped to improve performance and supported *Responsible Care's Guiding Principles*, they've now evolved into a structured *Responsible Care Management System (RCMS)* which outlines processes necessary to implement and maintain *Responsible Care* within our company.

To continue as a *Responsible Care Partner*, all Partners must pursue Formal RCMS Certification through a third party audit protocol which reviews the company's Safety management system and implementation. Dana is pursuing this Certification.

Two processes necessary for certification that directly relate to our business relationship are (1) the approval/qualification of Tank Washes and (2) vendor participation in Dana's Vendor Corrective Action Program.

To facilitate the qualification/approval of tank washes, two actions need to occur.

1. The completion of an *NTTC Truck Cleaning Facility Form* (2003 edition with addendum). If you have a current copy on file, please send (or transmit via e-mail) it to the address, below. If you do not have a copy, please complete the enclosed form, ASAP, but within 30 days from your receipt of this letter.
2. A random sampling of Tank Washes will be audited by a Dana Internal Auditor against the received NTTC Tank Form. Audits may start in the third quarter, 08. Appointments will be arranged for the most opportune time-frames.

To participate in Dana's *Corrective Action Program*, you are asked to agree to develop corrective action plans (CAR's) to respond to *major* service failures caused by your facility. If and when a failure occurs, the responsible Dana Terminal Manager will send you a *Dana Vendor Corrective Action Form*, and you'll be asked to respond, per the form's instructions within (7) seven days. The form includes the standard CAR categories: *Problem*, *Root Cause*, and *Solution*. A returned *NTTC Truck Cleaning Facility Form* will confirm that you agree to participate in this CAR program.

Thank you for helping us maintain and improve the responsible management of chemicals. Our relationship is a key factor in this value chain. The stronger we make it, the more value we bring to all stakeholders. Your noted compliance to *NTTC* and *Responsible Care* practices, adds to this strength, as well as to the confidence and integrity of our business relationship.

Again, and finally, please return a fully processed NTTC form to the address below within 30 days of receipt of this letter. It confirms your commitment to both NTTC standards and continuous process improvement.

Sincerely,

*Jem*

# Gamajet IV "GT"

Our most powerful tank  
cleaner for large tank  
Applications

Our largest tank cleaner, the Gamajet IV "GT" is designed to clean larger sized tanks with diameters of over 15' (4.57 m). Developed and upgraded from the proven Gamajet III, the IV "GT" is a **hydraulically driven rotary tank cleaning** machine that revolves 360° in both horizontal and vertical planes. Synchronized solid jets provide a tight and thorough scouring pattern covering all interior tank surfaces in one complete cycle.

The IV "GT" is available in stainless steel or silicon bronze with a choice of oil-lubricated or flo-thru (wash fluid lubricated) gearboxes. Gear trains are designed to maximize wear life which offers **improved reliability and reduced downtime**.

A choice of twelve nozzle sizes, various hydraulic turbines and stators along with two gear systems, offer a **wide operating range of flow rates, nozzle rotational speeds, and wash cycles**. The IV "GT" is fully capable of high concentration chemical recirculation cleaning or high pressure – low volume water jet scrubbing for fixed CIP automated systems.

**Company**  
**Products**

## Waste Management Box Management Program

### *Procedure*

- ① 1. Boxes will be checked into the Tankwash office.
2. A Waste Management Representative will be called for work requested.  
-Current contact is Roger Lara- 281-504-1532
3. A Waste Management Equipment Work Request form will be filled out, estimates will be performed based on requested work. These will be carbon copy forms (4). The first 2 copies will be put in the Waste Management container service (incomplete) smoke tray by date order. 4th copy will go with the container in a water tight tube.
4. An estimate via e-mail will be sent and approved by Waste Management personnel. Any other work performed due to discovery by CES will be approved and resubmitted prior to work performed. (Example: Bad gaskets for replacement and retest). Resubmit requests will be marked as such on the original form. 3rd copy after resubmitted work is requested on the original will be
5. A PO Number will be assigned and sent via e-mail or fax. PO Numbers will be put on the work request form. All containers with heel and surcharges for heel will be sent via e-mail to Roger
6. Boxes will be washed and leak tested. Any additional work needed will be communicated and approved by Waste Management and PO number adjustment confirmed via e-mail or fax.
7. Associate initials will be put next to area on work performed on the Waste Management Work Request form.
8. All forms will be attached by a water proof container for the request form.
9. All forms travel with the box until requested work is complete.
10. After a successful washout and leak test- boxes will go to maintenance for repairs (if Requested). After final repairs are made, maintenance will inform the tank wash manager that the container is complete and verify against original that all work was completed. Waste Management will be notified and date of notification will be documented via e-mail or fax and confirmation page.
11. After completion the carbon copy form or forms will be attached to the original and brought up to the billing department for invoicing.
12. Daily yard check and the Waste Management incomplete tray will reviewed daily and a yard check will be sent to Waste Management with asset status updated.
13. All boxes picked-up by Waste Management will be signed after driver inspection of the box. Any boxes left for more than 15 days after completion will be billed for a monthly fee of \$25/box and the beginning of each month after that.

4 carbon copy forms

1<sup>st</sup> original- original plus resubmitted requests and corresponding approval/PO number (s)-will be sent to customer with invoice

2<sup>nd</sup> billing- for CES files

3<sup>rd</sup> copy- copy for resubmit requests- only needed if more work was required than originally requested. If so, this form will be attached with the 4<sup>th</sup> form after work is approved.

4<sup>th</sup> form this form goes with the box.

### **Tank Wash Manager or Lead Man**

-must make sure that the original and all carbons show through.

-Make initial requests and mark on the form. Bring to Donna.

-Check seals on boxes prior to wash to see if gaskets are obviously worn out. This way the customer is not double charged (Quick Rinse, then Detergent Wash because gaskets are missing upon arrival)

-make sure to communicate with Maintenance (Donna) crew/welders when their part (Tankwash) is complete.

### **Maintenance (Dona)**

-Contact Roger to verify what is needed for the equipment.

-Responsible for finding parts, tracking boxes through the system, and making sure all work on the box was completed as per original form.

-Communication with the customer and tank wash, getting pricing to WM, POs from WM, and attachment of forms to the asset.

-Parts Inventory responsibilities (If Required).

-Communication and daily checking of WM assets through the system and follow-up with appropriate areas.

-Call customer when asset is complete.

-Attachment of original to carbon copies and bring to billing.

# NATIONAL TANK TRUCK CARRIERS, INC.

THE NATIONAL ORGANIZATION SERVING THE FOR-HIRE TANK TRUCK INDUSTRY

CLIFFORD J. HARVISON  
PRESIDENT

2200 MILL ROAD • ALEXANDRIA, VA 22314-4677  
PHONE: 703/838-1960 • FAX: 703/684-5753

## NTTC TANK TRUCK CLEANING AUDIT FORM

This tank truck cleaning facility audit form was originally developed by the National Tank Truck Carriers Tank Cleaning Council with input from members of the Chemical Manufacturers Association. In October, 1994, members of the NTTC Tank Cleaning Council revised the form to reflect the statutory and regulatory changes that had occurred since the audit form was first conceived.

The form was developed for companies wishing to perform a safety and environmental audit of their own cleaning facilities, or of those operated by others. The form is not intended to cover all safety and environmental issues which must be considered in operating or selecting a cleaning facility. More specifically, this form is not intended to determine issues of statutory or regulatory compliance.

Each facility should be evaluated for its own unique operation. The final page of this audit form is intended for use by the facility being audited to make comments on issues raised during the audit.

Audit form users are encouraged to make duplicate copies of this blank form for use in future audits.

When answering the audit form, please answer YES or NO entirely in order to avoid ambiguities. Space has been provided throughout the audit form for the audit form user to clarify negative answers if that person should feel so compelled.

NTTC - January, 2003

**SAFETY SECTION**

Please answer YES or NO to the following questions and provide details as required:

**A. RIGHT-TO-KNOW (29 CFR 1910.1200)**

1. Does facility have a written employee right-to-know program? YES \_\_\_\_\_ NO \_\_\_\_\_

2. Is right-to-know training conducted? YES \_\_\_\_\_ NO \_\_\_\_\_

If YES, when \_\_\_\_\_

3. Are training records kept at the cleaning facility? YES ☒ \_\_\_\_\_ NO \_\_\_\_\_

If NO, where kept? \_\_\_\_\_

4. Are MSDS for products handled and used at the facility readily accessible? YES ☒ \_\_\_\_\_ NO \_\_\_\_\_

5. Are containers of hazardous materials properly labeled in English? YES ☒ \_\_\_\_\_ NO \_\_\_\_\_

6. Is right-to-know information posted? YES ☒ \_\_\_\_\_ NO \_\_\_\_\_

If YES, where: \_\_\_\_\_

**B. CONFINED SPACE ENTRY (29 CFR 1910.146)**

1. Does a confined space entry program exist at the facility? YES ☒ \_\_\_\_\_ NO \_\_\_\_\_

2. Has facility been surveyed for confined spaces? YES \_\_\_\_\_ NO \_\_\_\_\_

3. Is there a written procedure for confined space entry? YES ☒ \_\_\_\_\_ NO \_\_\_\_\_

4. Is training for confined space entry conducted? YES ☒ \_\_\_\_\_ NO \_\_\_\_\_

5. Are there permit-required confined spaces at the facility? YES ☒ \_\_\_\_\_ NO \_\_\_\_\_

6. Is permit-required confined space entry conducted? YES ☒ \_\_\_\_\_ NO \_\_\_\_\_

Does written policy exist for the "stand-by" person on a confined space entry?

YES ☒ \_\_\_\_\_ NO \_\_\_\_\_

7. Where is permit posted? on all new entries

NTTC - January, 2003

**B. CONFINED SPACE ENTRY (29 CFR 1910.146) (Cont'd.)**

What are facility's atmospheric testing capabilities?

---

---

What tests are conducted prior to tank entry?

☒  
☒

a. Oxygen content?

b. Flammability?

☒  
CO

e. Toxicity?

f. Other

If other, please note:

---

---

9. What confined space entry equipment is available? (Check all that apply)

☒  
☒  
☒  
☒  
☒

a. Mechanical ventilation

b. Mechanical retractor

c. Harness

d. Lifeline

e. Alarm

☐  
☒

f. Motion detector

g. Supplied air

Compressor supplied or

Bottle required on an entry

☐

h. Other

☒  
☒

If other, please note:

---

---

---

10. How often is confined space entry equipment inspected?

entry available

11. Who provides confined space entry rescue?

Outside team

Emergency responders

12. If emergency responders, what rescue equipment is available for tank entry, and how often is it inspected?

---

---

---

NTTC – January, 2003

13. Are periodic rescue drills conducted? YES ☒ NO ☐

**C. PERSONAL PROTECTION (29 CFR Subpart I)**

1. Has a hazard assessment been conducted to evaluate the hazards in the workplace and to select proper equipment (29 CFR 1910.132)? YES ☐ NO ☐
2. Does the facility conduct initial and periodic training (1910.132)? YES ☐ NO ☐
3. Is the following proper personal protective equipment available and utilized according to the existing hazards? If the answer is YES, please briefly describe the equipment in the space provided.

**PROTECTIVE  
EQUIPMENT**

<u>Yes or No</u>	<u>Description</u>
<input checked="" type="checkbox"/>	
<input checked="" type="checkbox"/>	
<input checked="" type="checkbox"/>	
<input checked="" type="checkbox"/>	

If other, please describe:

---

---

---

4. Does the facility have a clothing policy (shoes, shirts, etc.)? YES ☒ NO ☐
5. Does the facility use or clean OSHA-regulated substances (29 CFR 1910.1000)?  
YES ☐ NO ☐
6. Does the facility have a written respiratory protection program (29 CFR 1910.134)?  
YES ☒ NO ☐
7. If utilized, are breathing air cylinders properly stored? YES ☒ NO ☐
8. Are respirators readily available? YES ☒ NO ☐
9. Is respirator training documented through written records on site? YES ☒ NO ☐

NTTC - January, 2003

**D. HOUSEKEEPING**

1. What are the facility's housekeeping policies? \_\_\_\_\_  
\_\_\_\_\_
2. Are floors, racks and railing cleaned daily? Yes
3. Are sumps and drains inspected on a pre-determined schedule and cleared of residue as necessary  
Yes
4. Are floors and aisles continually cleared of trip hazards? Yes
5. Are areas around safety shower/eye wash stations and fire extinguishers kept clear? Yes

Housekeeping comments:

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

**E. EMERGENCY RESPONSE**

1. Is there a written emergency response contingency plan at the facility, including provisions for community notification (40 CFR264.50 Subpart D)? YES \_\_\_\_\_ NO \_\_\_\_\_
2. Are emergency phone numbers current and posted? YES \_\_\_\_\_ NO \_\_\_\_\_
3. Are escape routes easily identified and kept clear of obstructions? YES \_\_\_\_\_ NO \_\_\_\_\_
4. Is the following emergency equipment available and serviceable?

	YES or NO
a. First aid kit	<u>Yes</u>
b. Emergency oxygen/breathing air	<u>Yes</u>
c. Fire extinguishers	<u>Yes</u>
d. Emergency showers/eye wash	<u>Yes</u>
e. Panic alarm	<u>Yes</u>
f. Other	_____

NTTC - January, 2003

**E. EMERGENCY RESPONSE (Cont'd)**

If other, please describe:

---

---

---

---

5. Does policy exist for initial and periodic training in the following? (If YES, please also note the frequency with which training is conducted and whether or not both the training and frequency are documented)?

	<u>TRAINING</u> (YES or NO)	<u>FREQUENCY</u>	<u>DOCUMENTATION</u> (YES or NO)
a. First aid	<input checked="" type="checkbox"/>	Annually	<input checked="" type="checkbox"/>
b. CPR	<input checked="" type="checkbox"/>	Annually	<input checked="" type="checkbox"/>
c. Fire extinguisher use	<input checked="" type="checkbox"/>	Annually	<input checked="" type="checkbox"/>
d. Implementation of Emergency Response Contingency Plan			

**F. GENERAL SAFETY/SECURITY**

- |   |   |                             |
|---|---|-----------------------------|
| 1. Is someone on-site 24-7?   | YES <input checked="" type="checkbox"/> | NO <input type="checkbox"/> |
| 2. Guard service on-site?   | YES <input checked="" type="checkbox"/> | NO <input type="checkbox"/> |
| 3. Is the facility fenced?  | YES <input checked="" type="checkbox"/> | NO <input type="checkbox"/> |
| 4. Do concrete parking pads exist on-site?  | YES <input checked="" type="checkbox"/> | NO <input type="checkbox"/> |
| 5. Are gates locked when the facility is closed?                                  | YES <input checked="" type="checkbox"/> | NO <input type="checkbox"/> |
| 6. Is there adequate lighting for the night parking of units?                     | YES <input checked="" type="checkbox"/> | NO <input type="checkbox"/> |
| 7. Is there adequate parking for the expected amount of business to be generated? | YES <input type="checkbox"/>            | NO <input type="checkbox"/> |
| 8. Is there an equipment sealing service available?                               | YES <input type="checkbox"/>            | NO <input type="checkbox"/> |
| 9. Is there a "sign in/out" policy for equipment arriving/departing the facility? | YES <input type="checkbox"/>            | NO <input type="checkbox"/> |

Explain

---

---

10. Are appropriate hazard warning signs posted? YES ☒ NO ☐

NTTC – January, 2003

**F. GENERAL SAFETY/SECURITY (Cont'd)**

11. Is the facility equipped with fall protection?

YES \_\_\_\_\_ NO \_\_\_\_\_

If YES, please describe: \_\_\_\_\_

12. Describe lighting systems for general tank cleaning operation as well as for tank entry:

*Explosion proof light used at all times*

13. Are vapor-proof and explosion-proof drop lights used?

YES ☒ NO \_\_\_\_\_

14. Are grounding cables utilized?

YES ☒ NO \_\_\_\_\_

15. Describe ventilation for general tank cleaning operation as well as for tank entry:

16. How are incompatible materials segregated?

17. Describe cleaning chemicals storage area (i.e. containment, run-on/run-off, compatible materials, spill control, etc.):

18. Are fire-resistant containers used for appropriate storage of flammable materials?

YES \_\_\_\_\_ NO \_\_\_\_\_

19. Are OSHA 300 Forms posted in February and maintained for five (5) years?

YES \_\_\_\_\_ NO \_\_\_\_\_

Comments on GENERAL SAFETY/SECURITY:

NTTC – January, 2003

## G. DRUG AND ALCOHOL PROGRAMS

1. Does the facility have a drug/alcohol-testing program? YES \_\_\_\_\_ NO \_\_\_\_\_ If YES, please explain briefly:

---

---

2. Does the facility have an employee assistance program (EAP)? YES \_\_\_\_\_ NO \_\_\_\_\_

## H. WORKER PHYSICALS

1. Does the facility require a post-job offer physical as a condition of employment? YES \_\_\_\_\_ NO \_\_\_\_\_

2. Are follow-up physicals and/or medical monitoring performed? YES \_\_\_\_\_ NO \_\_\_\_\_

If YES, how often? \_\_\_\_\_

---

## RCRA SECTION

1. What types of materials are cleaned at this facility (Check all that apply)?

*After Triple Rinsed*

<input type="checkbox"/>	a. Non-regulated materials
<input type="checkbox"/>	b. RCRA empty containers
<input type="checkbox"/>	c. U-listed materials
<input checked="" type="checkbox"/>	d. P-listed materials
<input checked="" type="checkbox"/>	e. RCRA hazardous wastes
<input type="checkbox"/>	f. Other

If other, please explain? \_\_\_\_\_

---

2. Does this facility generate any hazardous waste? YES ☒ NO \_\_\_\_\_

If YES, please list the 12-digit EPA generator identification/notification number (40 CFR 262):

---

3. Does this facility have a Treatment, Storage and Disposal (TSD) permit? YES \_\_\_\_\_ NO \_\_\_\_\_

If YES, please list EPA identification number: \_\_\_\_\_

4. Does the facility hold hazardous waste in excess of 90 days? YES \_\_\_\_\_ NO ☒

NTTC - January, 2003

**RCRA SECTION (Cont'd)**

If YES, please explain: \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

5. Has industrial or hazardous waste ever been disposed of on-site? YES \_\_\_\_\_ NO \_\_\_\_\_

If YES, please describe: \_\_\_\_\_

\_\_\_\_\_

6. Does the facility have a written waste-management program? YES ☒ NO \_\_\_\_\_

7. If YES, is waste-management program available for inspection? YES \_\_\_\_\_ NO \_\_\_\_\_

8. In regards to regulated waste streams, list the following:

1) current wastes, \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

(2) methods of disposal, \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

(3) company name of facility receiving waste, \_\_\_\_\_

\_\_\_\_\_

(4) address of facility receiving waste, \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

(5) receiving disposal facility's EPA identification number, \_\_\_\_\_

NTTC - January, 2003

RCRA SECTION (Cont'd)

(6) transporter's name. \_\_\_\_\_

9. In regards to **non-regulated** waste streams, list the following:

1) current wastes: \_\_\_\_\_

(2) methods of disposal: \_\_\_\_\_

(3) company name of facility receiving waste: \_\_\_\_\_

(4) address of facility receiving waste: \_\_\_\_\_

(5) receiving disposal facility's EPA identification number: \_\_\_\_\_

(6) transporter's name: \_\_\_\_\_

11. Does the facility generate F-listed solvent wastes in the cleaning process (40 CFR 261.31)?

YES \_\_\_\_\_ NO \_\_\_\_\_

12. Describe the facility's internal procedures to account for and to track waste generated:

13 Where, and for how long, are internal waste records kept?

NTTC - January, 2003

RCRA SECTION (cont'd)

14. Are hazardous waste manifests completed, tracked, filed and retained for three years per applicable regulations (40 CFR 262.40)? YES \_\_\_\_\_ NO \_\_\_\_\_

Are land disposal restriction (LDR) forms tracked with the manifest and retained for five years?

YES \_\_\_\_\_ NO \_\_\_\_\_

15. How are hazardous wastes accumulated? (Check all that apply) (40 CFR 265.170 Subparts (I), (J))

☒

a. Drums

☐

b. Aboveground Storage Tanks

☐

c. Underground Storage Tanks

☒

d. Tank Trailers

☒

e. Other

If other, please explain:

VAC Bays, Rail Pier Bays

16. Describe the facility's waste management area (i.e. drum storage, concrete pad, etc.)

17. Does the facility have in place a written annual training and documentation program for all employees handling hazardous wastes (40 CFR 262)? YES \_\_\_\_\_ NO \_\_\_\_\_

18. Is the RCRA training program administered by a qualified instructor? YES \_\_\_\_\_ NO \_\_\_\_\_

If YES, what are the instructor's qualifications (40 CFR 262)?

19. Does the facility have a waste minimization plan? YES \_\_\_\_\_ NO \_\_\_\_\_

If YES, please describe briefly:

20. Has this facility had a RCRA inspection? YES \_\_\_\_\_ NO \_\_\_\_\_

If YES, please provide date of most recent inspection:

21. Has this facility had any RCRA violations? YES \_\_\_\_\_ NO \_\_\_\_\_

NTTC - January, 2003  
RCRA SECTION (cont'd)

If YES, please explain: \_\_\_\_\_

\_\_\_\_\_

22. Is the facility under any type of RCRA regulatory compliance order or action? YES \_\_\_\_\_ NO \_\_\_\_\_

If YES, please explain: \_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

\_\_\_\_\_

23. Does the facility have underground storage tanks (40 CFR 280)? YES \_\_\_\_\_ NO \_\_\_\_\_

If YES, please list tank age, size, and type of service:

TANK AGE	SIZE	TYPE OF SERVICE

24. Who is the person to contact regarding environmental questions?

Name: \_\_\_\_\_

Title: \_\_\_\_\_

Telephone(s): \_\_\_\_\_ Fax(es): \_\_\_\_\_

E-mail address: \_\_\_\_\_

NTTC - January, 2003

**CERCLA SECTION**

1. Is the facility presently, or has the facility in the past, been involved in any CERCLA corrective action on-site?      YES \_\_\_\_\_ NO \_\_\_\_\_

If YES, please explain:

---

---

2. Is the facility included on CERCLA's list or state's list?      YES \_\_\_\_\_ NO \_\_\_\_\_
3. Is this facility included on the National Priority List or state's list?      YES \_\_\_\_\_ NO \_\_\_\_\_

**CLEAN WATER ACT SECTION**

- 1 Describe containment and drainage in cleaning rack operations area (i.e. roof[s]), number of bays):

---

---

---

---

2. How do you dispose of your wastewater effluent (check all that apply)?

<input type="checkbox"/>	a. Treated on-site and discharged under a NPDES permit
<input type="checkbox"/>	b. Pretreated on-site, then discharged to a POTW
<input type="checkbox"/>	c. Discharged directly to a POTW
<input type="checkbox"/>	d. Discharged directly to a ditch, stream, river, lake, ocean, ground, etc.
<input type="checkbox"/>	e. Wastewater collected and sent off-site to a permitted commercial wastewater treatment facility
<input type="checkbox"/>	f. Other

If other, please explain:

---

---

---

NTTC - January, 2003

**CLEAN WATER ACT SECTION (Cont'd)**

3. If pretreatment is used, please describe system:

---

---

---

4. If a POTW or a permitted commercial wastewater disposal facility is used, please list:

<u>NAME</u>	<u>ADDRESS</u>	<u>PERMIT NUMBER</u>
-------------	----------------	----------------------

<hr/>	<hr/>	<hr/>
<hr/>	<hr/>	<hr/>
<hr/>	<hr/>	<hr/>

5. List permits, and agencies that issued the permits, for wastewater and sludge disposal, if applicable:

<u>PERMIT</u>	<u>AGENCY</u>
---------------	---------------

<hr/>	<hr/>
<hr/>	<hr/>
<hr/>	<hr/>
<hr/>	<hr/>

6. List the testing requirements to satisfy wastewater permits:

---

7. What are the permit limits for pollutants regulated under the pretreatment standards from the 2000 TEC Final Rule (40 CFR § 442)?

---

---

8. Is this facility complying with the 2000 EPA Effluent Guideline Limitations by way of a pollutant management plan or through numeric limitations? Explain:

---

---

NTTC – January, 2003

**CLEAN WATER ACT SECTION (Cont'd)**

9. Describe the self-monitoring you perform to control pre-treatment process:

---

---

---

10. Is the analysis listed in response to question number 7 available for inspection? YES \_\_\_\_\_ NO \_\_\_\_\_

11. Has this facility been audited or inspected by any wastewater regulatory agency in the past 12 months?

YES \_\_\_\_\_ NO \_\_\_\_\_ If YES, list agencies and dates:

AGENCY

DATE

---

---

---

12. Is this facility operating under any wastewater compliance orders? YES \_\_\_\_\_ NO \_\_\_\_\_

If YES, please explain

---

---

---

---

---

---

13. Does facility have a stormwater run-off permit? YES \_\_\_\_\_ NO \_\_\_\_\_

If YES, is permit MULTI-SECTOR GENERAL \_\_\_\_\_ or is it INDIVIDUAL \_\_\_\_\_

14. If facility has a stormwater permit, what is permit identification number? \_\_\_\_\_

15. Does the facility have a Stormwater Pollution Prevention Plan and/are Best Management Practices in place?

YES \_\_\_\_\_ NO \_\_\_\_\_ If YES, please describe briefly:

---

---

NTTC – January, 2003

**CLEAN AIR ACT SECTION**

1. Identify all processes and equipment covered by any air permits (tank cleaning, boiler, wastewater treatment, tanks, lot dust, etc.):

PROCESS OR EQUIPMENT

PERMIT NUMBER

AGENCY

---

---

---

2. List any air pollution control technologies employed:

---

---

---

3. Is the facility under any type of air compliance order or action? YES \_\_\_\_\_ NO \_\_\_\_\_

If YES, please explain: \_\_\_\_\_

4. Has this facility been audited or inspected by any air regulatory agency? YES \_\_\_\_\_ NO \_\_\_\_\_

If YES, please list agency and dates:

AGENCY

DATE

---

---

---

---

5. Please characterize the community in which facility is located (i.e. proximity to residential areas, schools, etc.):

---

---

---

---

NTTC – January, 2003

**SOIL SECTION**

1. Does the facility have underground tanks? If yes, list tank age, size and type of service:

Size/Gallons	Age	Type of Service

2. Has a soil/subsoil evaluation been completed in the last:

2 Years

More than 5 years

5 Years

Do not know

Please  
explain:

---

---

---

3. Is the facility presently or has the facility in the past been involved in an on-site soil clean-up for

Fuel tank/drum leakage/replacement?	YES	_____	NO	_____
Waste oil tank/drum leakage/replacement?	YES	_____	NO	_____
Chemical tank/drum leakage/replacement?	YES	_____	NO	_____
Glycol tank/drum leakage/replacement?	YES	_____	NO	_____
Battery storage area leakage?	YES	_____	NO	_____
Cleaning fluids container leakage?	YES	_____	NO	_____
Other, explain:	YES	_____	NO	_____

---

---

---

4. Are there any areas of suspected contamination by a third party? YES \_\_\_\_\_ NO \_\_\_\_\_

**Disclaimer:** Information in this audit form has been gathered from numerous sources and represents NTTC's best understanding of what is necessary to conduct a review and assessment of cargo tank cleaning facilities. Use of this form is voluntary. NTTC makes no representation, warranty or guarantee, expressed or implied, as to the correctness or sufficiency of material in this form, and NTTC assumes no responsibility or liability whatsoever in connection therewith.

**To Vendor/Supplier:** The following *Report* is an integral part of both LTC's *Quality Management Process (QM)* and *Responsible Care* commitment. Please complete the *Corrective Action* Material and send/transmit back to LTC Manager, ASAP, but within seven days of issue. If more time is necessary, please re-set response date with LTC Manager.

**To LTC Manager:** Complete identification & problem sections; send/transmit to Vendor, with copy to T&D. If appropriate, transmit or send a cover e-mail or note to vendor. Response date should be seven days from issue date. Complaint # is your LTC facility code plus issue date-no spaces (2112703 is CHSC, Feb 7, 2003). See P&P 10.22 for important detail.

## Request for Taxpayer Identification Number and Certification

Give form to the  
requester. Do not  
send to the IRS.

Print or type  
See Specific Instructions on page 2.

Name (as shown on your income tax return)

Business name, if different from above

Check appropriate box: ☐ Individual/  
Sole proprietor

☐ Corporation

☐ Partnership

☐ Other ▶

☐ Exempt from backup  
withholding

Address (number, street, and apt. or suite no.)

Requester's name and address (optional)

City, state, and ZIP code

List account number(s) here (optional)

### Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on Line 1 to avoid backup withholding. For individuals, this is your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the Part I instructions on page 3. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN* on page 3.

**Note.** If the account is in more than one name, see the chart on page 4 for guidelines on whose number to enter.

Social security number

or

Employer identification number

### Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me), and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding, and
3. I am a U.S. person (including a U.S. resident alien).

**Certification instructions.** You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the Certification, but you must provide your correct TIN. (See the instructions on page 4.)

### Purpose of Form

A person who is required to file an information return with the IRS, must obtain your correct taxpayer identification number (TIN) to report, for example, income paid to you, real estate transactions, mortgage interest you paid, acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA.

**U.S. person.** Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN to the person requesting it (the requester) and, when applicable, to:

1. Certify that the TIN you are giving is correct (or you are waiting for a number to be issued),
2. Certify that you are not subject to backup withholding, or
3. Claim exemption from backup withholding if you are a U.S. exempt payee.

In 3 above, if applicable, you are also certifying that as a U.S. person, your allocable share of any partnership income from a U.S. trade or business is not subject to the withholding tax on foreign partners' share of effectively connected income.

**Note.** If a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

For federal tax purposes, you are considered a person if you are:

- An individual who is a citizen or resident of the United States,
- A partnership, corporation, company, or association created or organized in the United States or under the laws of the United States, or
- Any estate (other than a foreign estate) or trust. See Regulations sections 301.7701-6(a) and 7(a) for additional information.

**Special rules for partnerships.** Partnerships that conduct a trade or business in the United States are generally required to pay a withholding tax on any foreign partners' share of income from such business. Further, in certain cases where a Form W-9 has not been received, a partnership is required to presume that a partner is a foreign person, and pay the withholding tax. Therefore, if you are a U.S. person that is a partner in a partnership conducting a trade or business in the United States, provide Form W-9 to the partnership to establish your U.S. status and avoid withholding on your share of partnership income.

The person who gives Form W-9 to the partnership for purposes of establishing its U.S. status and avoiding withholding on its allocable share of net income from the partnership conducting a trade or business in the United States is in the following cases:

- The U.S. owner of a disregarded entity and not the entity,

### Purpose of Form

A person who is required to file an information return with the IRS, must obtain your correct taxpayer identification number (TIN) to report, for example, income paid to you, real estate transactions, mortgage interest you paid, acquisition or abandonment of secured property, cancellation of debt, or contributions you made to an IRA.

**U.S. person.** Use Form W-9 only if you are a U.S. person (including a resident alien), to provide your correct TIN to the person requesting it (the requester) and, when applicable, to:

1. Certify that the TIN you are giving is correct (or you are waiting for a number to be issued),
2. Certify that you are not subject to backup withholding, or
3. Claim exemption from backup withholding if you are a U.S. exempt payee.

In 3 above, if applicable, you are also certifying that as a U.S. person, your allocable share of any partnership income from a U.S. trade or business is not subject to the withholding tax on foreign partners' share of effectively connected income.

**Note.** If a requester gives you a form other than Form W-9 to request your TIN, you must use the requester's form if it is substantially similar to this Form W-9.

For federal tax purposes, you are considered a person if you are:

- An individual who is a citizen or resident of the United States,
- A partnership, corporation, company, or association created or organized in the United States or under the laws of the United States, or
- Any estate (other than a foreign estate) or trust. See Regulations sections 301.7701-6(a) and 7(a) for additional information.

**Special rules for partnerships.** Partnerships that conduct a trade or business in the United States are generally required to pay a withholding tax on any foreign partners' share of income from such business. Further, in certain cases where a Form W-9 has not been received, a partnership is required to presume that a partner is a foreign person, and pay the withholding tax. Therefore, if you are a U.S. person that is a partner in a partnership conducting a trade or business in the United States, provide Form W-9 to the partnership to establish your U.S. status and avoid withholding on your share of partnership income.

The person who gives Form W-9 to the partnership for purposes of establishing its U.S. status and avoiding withholding on its allocable share of net income from the partnership conducting a trade or business in the United States is in the following cases:

- The U.S. owner of a disregarded entity and not the entity,

27 - W/H Tee  
47 - HAZ

## Request for Taxpayer Identification Number and Certification

Give form to the  
requester. Do not  
send to the IRS.

Print or type See Specific Instructions on page 2.	Name (as shown on your income tax return)	
	Business name, if different from above	
	Check appropriate box: <input type="checkbox"/> Individual/ Sole proprietor <input type="checkbox"/> Corporation <input type="checkbox"/> Partnership <input type="checkbox"/> Other ▶	<input type="checkbox"/> Exempt from backup withholding
	Address (number, street, and apt. or suite no.)	Requester's name and address (optional)
	City, state, and ZIP code	
List account number(s) here (optional)		

### Part I Taxpayer Identification Number (TIN)

Enter your TIN in the appropriate box. The TIN provided must match the name given on Line 1 to avoid backup withholding. For individuals, this is your social security number (SSN). However, for a resident alien, sole proprietor, or disregarded entity, see the Part I instructions on page 3. For other entities, it is your employer identification number (EIN). If you do not have a number, see *How to get a TIN* on page 3.

**Note.** If the account is in more than one name, see the chart on page 4 for guidelines on whose number to enter.

Social security number								
			+			+		
or								
Employer identification number								
			+					

### Part II Certification

Under penalties of perjury, I certify that:

1. The number shown on this form is my correct taxpayer identification number (or I am waiting for a number to be issued to me), and
2. I am not subject to backup withholding because: (a) I am exempt from backup withholding, or (b) I have not been notified by the Internal Revenue Service (IRS) that I am subject to backup withholding as a result of a failure to report all interest or dividends, or (c) the IRS has notified me that I am no longer subject to backup withholding, and
3. I am a U.S. person (including a U.S. resident alien).

**Certification instructions.** You must cross out item 2 above if you have been notified by the IRS that you are currently subject to backup withholding because you have failed to report all interest and dividends on your tax return. For real estate transactions, item 2 does not apply. For mortgage interest paid, acquisition or abandonment of secured property, cancellation of debt, contributions to an individual retirement arrangement (IRA), and generally, payments other than interest and dividends, you are not required to sign the Certification, but you must provide your correct TIN. (See the instructions on page 4.)

Client: Siemens Hydrocarbon Recovery  
105 S. Alexander St.  
Plant City, FL 33563

Attention: Anthony Piotrowski  
Phone Number: 407-709-3600  
Project Name: TARMAC  
Project Number: n/a  
Project Location: Florida  
Sampled By: n/a  
Date Sampled: 12/19/07 13:00  
Date Received: 12/19/07 16:40  
Date Reported: 12/20/07  
Lab. Report #: 121907-021

**Project Description**

The analytical results for the samples identified in this report were submitted for analysis as outlined by the attached Chain of Custody. The results for the quality control samples were reviewed and found to meet the acceptance criteria for precision and accuracy or properly flagged. Unless noted in this report or a case narrative, all data in this analytical report is in compliance with NELAP standards. This report may not be reproduced in part or whole without the permission of PES.

Notes: Sample results reported at the Practical Quantitation Limit (PQL)  
Solid samples reported on Dry Weight basis.

Approved By: David Pomella  
David Pomella, Laboratory Director

## DATA QUALIFIER CODES

## SYMBOL MEANING

- A Value reported is the arithmetic mean (average) of two or more determinations. This code shall be used if the reported value is the average of results for two or more discrete and separate samples. These samples shall have been processed and analyzed independently. Do not use this code if the data are the result of replicate analysis on the same sample aliquot, extract or digestate.
- H Value based on field kit determination; results may not be accurate. This code shall be used if a field screening test (i.e., field gas chromatograph data, immunoassay, vendor-supplied field kit, etc.) was used to generate the value and the field kit or method has not been recognized by the Department as equivalent to laboratory methods.
- I The reported value is between the laboratory method detection limit and the laboratory practical quantitation limit.
- J Estimated value. A "J" value shall be accompanied by a narrative justification for its use. Where possible, the organization shall report whether the actual value is less than or greater than the reported value. A "J" value shall not be used as a substitute for K, L, M, T, V or Y, however, if additional reasons exist for identifying the value as estimate (e.g., matrix spiked failed to meet acceptance criteria), the "J" code may be added to a K, L, M, T, V, or Y. The following are some examples of narrative descriptions that may accompany a "J" code:
- No known quality control criteria exist for the component;
  - The reported value failed to meet the established quality control criteria for either precision or accuracy (the specific failure must be identified);
  - The sample matrix interfered with the ability to make any accurate determination;
  - The data are questionable because of improper laboratory or field protocols (e.g., composite sample was collected instead of a grab sample);
  - The field calibration verification did not meet calibration acceptance criteria.
- K Off-scale low. Actual value is known to be less than the value given. This code shall be used if:
1. The value is less than the lowest calibration standard and the calibration curve is known to be non-linear; or
  2. The value is known to be less than the reported value based on sample size, dilution.
- This code shall not be used to report values that are less than the laboratory practical quantitation limit or laboratory method detection limit.
- L Off-scale high. Actual value is known to be greater than value given. To be used when the concentration of the analyte is above the acceptable level for quantitation (exceeds the linear range or highest calibration standard) and the calibration curve is known to exhibit a negative deflection.
- M When reporting chemical analyses: presence of material is verified but not quantified; the actual value is less than the value given. The reported value shall be the laboratory practical quantitation limit. This code shall be used if the level is too low to permit accurate quantification, but the estimated concentration is greater than the method detection limit. If the value is less than the method detection limit use "T" below.
- N Presumptive evidence of presence of material. This qualifier shall be used if:
1. The component has been tentatively identified based on mass spectral library search; or
  2. There is an indication that the analyte is present, but quality control requirements for confirmation were not met (i.e., presence of analyte was not confirmed by alternative procedures).
- O Sampled, but analysis lost or not performed.
- Q Sample held beyond the accepted holding time. This code shall be used if the value is derived from a sample that was prepared or analyzed after the approved holding time restrictions for sample preparation or analysis.
- T Value reported is less than the laboratory method detection limit. The value is reported for informational purposes only and shall not be used in statistical analysis.
- U Indicates that the compound was analyzed for but not detected. This symbol shall be used to indicate that the specified component was not detected. The value associated with the qualifier shall be the laboratory method detection limit. Unless requested by the client, less than the method detection limit values shall not be reported (see "T" above).
- V Indicates that the analyte was detected in both the sample and the associated method blank. Note: the value in the blank shall not be subtracted from associated samples.
- Y The laboratory analysis was from an improperly preserved sample. The data may not be accurate.
- Z Data are rejected and should not be used. Some or all of the quality control data for the analyte were outside criteria, and the presence or absence of the analyte cannot be determined from the data.
- \* Not currently accredited for this analyte.
- ! Not within scope of method.

moisture is removed, then resin starts to burn in flame at 230°C. Autoignition occurs above 500°C. Possible fire combustion products: Alkylbenzenes, vinylbenzenes, naphthalene, benzaldehydes, phenol, carbon dioxide, water, organic amines, chlorine, nitrogen oxides, ammonia, methyl chloride.

**FIRE-FIGHTING EQUIPMENT:** Wear positive pressure self-contained breathing apparatus.

### 4. REACTIVITY DATA:

**STABILITY: (CONDITIONS TO AVOID)** Stable under normal handling and storage conditions. See incompatibility statement.

**INCOMPATIBILITY: (SPECIFIC MATERIALS TO AVOID)** Warning: Oxidizing agents such as nitric acid attack organic ion exchange resin under certain conditions and could result in a slightly degraded resin up to an explosive reaction. Before using strong oxidizing agents, consult someone knowledgeable in handling such materials.

**HAZARDOUS DECOMPOSITION PRODUCTS:** See possible combustion products in section 3.

**HAZARDOUS POLYMERIZATION:** Will not occur.

### 5. ENVIRONMENTAL AND DISPOSAL INFORMATION:

**ACTION TO TAKE FOR SPILLS/LEAKS:** Sweep up. Caution: May be slippery.

**DISPOSAL METHOD:** Bury resin in licensed landfill or burn in approved incinerator according to local, state, and federal regulations. For resin contaminated with hazardous material,

#### 5. ENVIRONMENTAL AND DISPOSAL INFORMATION: (CONTINUED)

dispose of mixture as hazardous material according to local, state and federal regulations.

#### 6. HEALTH HAZARD DATA:

**EYES:** Solid or dust may cause irritation or corneal injury due to mechanical action.

**SKIN CONTACT:** Prolonged or repeated exposure not likely to cause significant skin irritation.

**SKIN ABSORPTION:** Skin absorption is unlikely due to physical properties.

**INGESTION:** Single dose oral LD50 has not been determined. Single dose oral toxicity is believed to be low. No hazards anticipated from ingestion incidental to industrial exposure.

**INHALATION:** Vapors are unlikely due to physical properties.

**SYSTEMIC & OTHER EFFECTS:** No specific data available, however, repeated exposures are not anticipated to cause any significant adverse effects.

#### 7. FIRST AID:

**EYES:** Irrigate immediately with water for at least 5 minutes. Mechanical irritation only.

**SKIN:** No adverse effects anticipated by this route of exposure.

**INGESTION:** No adverse effects anticipated by this route of exposure incidental to proper industrial handling.

**INHALATION:** No adverse effects anticipated by this route of

## 7. FIRST AID: (CONTINUED)

exposure.

## 8. HANDLING PRECAUTIONS:

EXPOSURE GUIDELINE(S): None established.

VENTILATION: Good general ventilation should be sufficient.

RESPIRATORY PROTECTION: No respiratory protection should be needed.

SKIN PROTECTION: No precautions other than clean body-covering clothing should be needed.

EYE PROTECTION: Use safety glasses.

## 9. ADDITIONAL INFORMATION:

### SPECIAL PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE:

Practice reasonable care and caution. Metal equipment should be compatible with feed, regenerant, resin form, and effluent of that process.

### TSCA CONSIDERATIONS:

Every different salt or ionic form of an ion-exchange resin is a separate chemical. If you use an ion-exchange resin for ion-exchange purposes and then remove the by-product resin from its vessel or container prior to recovery of the original or another form of the resin or of another chemical, the by-product resin must be listed on the TSCA inventory (unless an exemption is applicable). It is the responsibility of the customer to ensure that such isolated, recycled by-product resins are in compliance with TSCA. Failure to comply could result in substantial civil or criminal penalties being assessed by the Environmental Protection Agency.

MSDS: 001158

## 1. INGREDIENTS: (% w/w, unless otherwise noted)

Sulfonated copolymer of styrene and  
divinylbenzene in the sodium form  
Water

CAS# 069011-22-9 40-70%  
CAS# 007732-18-5

This document is prepared pursuant to the OSHA Hazard  
Communication Standard (29 CFR 1910.1200). In addition, other  
substances not 'Hazardous' per this OSHA Standard may be listed.  
Where proprietary ingredient shows, the identity may be made  
available as provided in this standard.

## 2. PHYSICAL DATA:

BOILING POINT: Not applicable  
VAP PRESS: Not applicable  
VAP DENSITY: Not applicable  
SOL. IN WATER: Insoluble  
SP. GRAVITY: Density 53 lb/ft<sup>3</sup>  
APPEARANCE: Light yellow to brown solid (beads).  
ODOR: Not applicable

## 3. FIRE AND EXPLOSION HAZARD DATA:

FLASH POINT: Not applic.  
METHOD USED: Not applic.

FLAMMABLE LIMITS  
LFL: Not applic.  
UFL: Not applic.

EXTINGUISHING MEDIA: Dry chemical.

FIRE & EXPLOSION HAZARDS: Product is not combustible  
until moisture is removed, then resin starts to burn  
in flame at 2300C. Autoignition occurs above 500C.  
Naphthalene, benzaldehydes, phenol, carbon dioxide, water,

### 3. FIRE AND EXPLOSION HAZARD DATA: (CONTINUED)

sulfur oxides, organic sulfonates are possible fire combustion products.

FIRE-FIGHTING EQUIPMENT: Wear positive pressure self-contained breathing apparatus.

### 4. REACTIVITY DATA:

STABILITY: (CONDITIONS TO AVOID) Stable under normal handling and storage conditions. See incompatibility statement.

INCOMPATIBILITY: (SPECIFIC MATERIALS TO AVOID) Warning: Oxidizing agents such as nitric acid attack organic ion exchange resins under certain conditions and could result in a slightly degraded resin up to an explosive reaction. Before using strong oxidizing agents, consult sources knowledgeable in handling such materials.

HAZARDOUS DECOMPOSITION PRODUCTS: See possible combustion products in section 3.

HAZARDOUS POLYMERIZATION: Will not occur.

### 5. ENVIRONMENTAL AND DISPOSAL INFORMATION:

ACTION TO TAKE FOR SPILLS/LEAKS: Sweep up. Caution: May be slippery.

DISPOSAL METHOD: Bury resin in licensed landfill or burn in approved incinerator according to local, state, and federal regulations. For resin contaminated with hazardous material, dispose of mixture as hazardous material according to local, state, and federal regulations.

### 6. HEALTH HAZARD DATA:

Product Name: DOWEX® M8C-1 CATION EXCHANGE RESIN

Effective Date: 03/19/97 Date Printed: 04/06/99

MSDS: 001158

#### 6. HEALTH HAZARD DATA: (CONTINUED)

**EYE:** May cause slight transient (temporary) eye irritation. Solid or dust may cause irritation or corneal injury due to mechanical action.

**SKIN CONTACT:** Essentially nonirritating to skin.

**SKIN ABSORPTION:** Skin absorption is unlikely due to physical properties.

**INGESTION:** Single dose oral toxicity is believed to be low. No hazards anticipated from ingestion incidental to industrial exposure.

**INHALATION:** Vapors are unlikely due to physical properties.

**SYSTEMIC & OTHER EFFECTS:** No specific data available, however, repeated exposures are not anticipated to cause any significant adverse effects.

#### 7. FIRST AID:

**EYES:** Irrigate immediately with water for at least 5 minutes.

**SKIN:** No adverse effects anticipated by this route of exposure.

**INGESTION:** No adverse effects anticipated by this route of exposure incidental to proper industrial handling.

**INHALATION:** No adverse effects anticipated by this route of exposure.

#### 8. HANDLING PRECAUTIONS:

**EXPOSURE GUIDELINE(S):** None established.

## B. HANDLING PRECAUTIONS (CONTINUED)

**VENTILATION:** Good general ventilation should be sufficient.

**RESPIRATORY PROTECTION:** No respiratory protection should be needed.

**SKIN PROTECTION:** No precautions other than clean body-covering clothing should be needed.

**EYE PROTECTION:** Use safety glasses.

## C. ADDITIONAL INFORMATION:

### SPECIAL PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE:

Practice reasonable care and caution. Metal equipment should be compatible with feed, regenerant, resin form, and effluent of that process.

### TSCA CONSIDERATIONS:

Every different salt or ionic form of an ion-exchange resin is a separate chemical. If you use an ion-exchange resin for ion-exchange purposes and then remove the by-product resin from its vessel or container prior to recovery of the original or another form of the resin or of another chemical, the by-product resin must be listed on the TSCA inventory (unless an exemption is applicable). It is the responsibility of the customer to ensure that such isolated, recycled by-product resins are in compliance with TSCA. Failure to comply could result in substantial civil or criminal penalties being assessed by the Environmental Protection Agency.

**MSDS STATUS:** Revised Section 2, color range.

For information regarding state/provincial and federal regulations see (R) indicates a Trademark of The Dow Chemical Company

**REGULATORY INFORMATION:** (Not meant to be all-inclusive--selected regulations represented.)

**NOTICE:** The information herein is presented in good faith and believed to be accurate as the effective date shown above. However, no warranty, express or implied, is given. Regulatory requirements are subject to change and may differ from one location to another; it is the buyer's responsibility to ensure that its activities comply with federal, state or provincial, and local laws. The following specific information is made for the purpose of complying with numerous federal, state or provincial, and local laws and regulations. See MSD Sheet for health and safety information.

#### U.S. REGULATIONS

**SARA HAZARD CATEGORY:** This product has been reviewed according to the EPA "Hazard Categories" promulgated under Sections 311 and 312 of the Superfund Amendment and Reauthorization Act of 1986 (SARA Title III) and is considered, under applicable definitions, to meet the following categories:

Not to have met any hazard category

#### CANADIAN REGULATIONS

**WHMIS INFORMATION:** The Canadian Workplace Hazardous Materials Information System (WHMIS) Classification for this product is:

This product is not a "Controlled Product" under WHMIS.

### Odor Management – Tank and Trailer Transfers Training Document Quiz

#### Trailer to Trailer Transfers:

1. Locate the \_\_\_\_\_ vent valve \_\_\_\_\_ on both trailers and hook one end to trailer A and the other end to trailer B.
2. What is the next step? Open vent valves

Why? Cause pressure to equalize between trailers

3. Open the discharge valve \_\_\_\_\_ on trailer A (loaded trailer) and the fill \_\_\_\_\_ valve on trailer B (empty trailer) and start filling trailer B by filling the pump.
4. When you are through transferring, close the \_\_\_\_\_ suction \_\_\_\_\_ valve on trailer A and connect the line to air blow-downs \_\_\_\_\_ until the line is clean \_\_\_\_\_.
5. What will the above procedure ensure? There are no spills and the lines are empty
6. Once the lines are empty, close the \_\_\_\_\_ fill line \_\_\_\_\_ for trailer B.
7. Shut both \_\_\_\_\_ vents \_\_\_\_\_ and remove the \_\_\_\_\_ air lines \_\_\_\_\_.

#### Trailer to Tank Transfers:

8. Locate (but do not OPEN \_\_\_\_\_) the vent valve on the Tank you are loading into and the vent valve on the Trailer you are loading from; hook one end of the vent hose to the \_\_\_\_\_ tank \_\_\_\_\_ and the other end to \_\_\_\_\_ trailer \_\_\_\_\_.
9. Open the \_\_\_\_\_ discharge valve \_\_\_\_\_ on both the Tank and the Trailer. This will cause the pressure or \_\_\_\_\_ vapors to equalize \_\_\_\_\_ between the Tank and the Trailer.
10. Open the discharge valve \_\_\_\_\_ on the trailer and the \_\_\_\_\_ fill valve \_\_\_\_\_ on the tank and start filling the tank by turning on the pump.
11. Once the tank is full and the trailer is empty, what is the next step? Close suction valve on trailer, connect line to the air blow-down until clean.
12. Once the lines are empty, close the \_\_\_\_\_ fill line \_\_\_\_\_ on the tank.
13. Shut both \_\_\_\_\_ vent valves \_\_\_\_\_ and remove the \_\_\_\_\_ air line \_\_\_\_\_.

## Tank to Trailer Transfers

14. Locate (but do not OPEN) the vent valve on the Trailer you are loading into and the vent valve on the Tank you are loading from; hook one end of the vent hose to the \_\_\_\_\_ tank and the other end to \_\_\_\_\_ trailer.
15. Open the \_\_\_\_\_ discharge valve on both the Tank and the Trailer. This will cause the pressure or \_\_\_\_\_ vapors to equalize between the Tank and the Trailer.
16. Open the \_\_\_\_\_ discharge valve on the tank and the \_\_\_\_\_ fill line on the trailer and start filling the trailer by turning on the pump.
11. Once the trailer is full and the tank is empty, what is the next step?  
Close suction valve on the tank and connect line to the air blow-down until the line is clean.
12. Once the lines are empty, close the \_\_\_\_\_ fill line on the trailer.
13. Shut both \_\_\_\_\_ vent valves and remove the \_\_\_\_\_ air lines

### Odor Management – Cleaning Tanks Training Document Quiz

1. What is the VERY FIRST thing you should do before you start to clean a tank?  
Check to ensure air permit allows the tank to be cleaned
2. Before attempting to clean a tank that may have odor, we must determine how to  
negate the odor by neutralizing the odor.
3. Therefore, you should figure out what you are going to do \_\_\_\_\_ before \_\_\_\_\_ you do it. What should you do if you are not sure what to do?  
Ask your supervisor

#### TANK TRAILERS:

4. What procedures should be followed to bleed pressure if the tank has pressure?  
Connect air hose to scrubber, then open the bleeder valve ¼ of the way and bleed the pressure to the scrubber.
5. Once pressure is relieved, remove a clean out port and install a fitting that will connect the clean out port to what?  
Overhead vapor scrubber
6. Therefore, no odorous tank trailers should be cleaned until the tank trailer is connected to a  
\_\_\_\_\_ scrubber \_\_\_\_\_ such that all vapors may be scrubbed.
7. What procedures should be followed if there is heel in the tank trailer?  
Shut dome lid; draw heel into a drum by connecting hose to bottom of discharge of trailer and other end to the 2" bung on the drum.
8. How should the drum with heel be vented to contain the odor?  
Vent drum to liquid scrubber or bucket of water
9. After heel is drained, connect a steam line to another clean out port add a quart of neutraline to the trailer and begin steaming slowly for 15 minutes. After 15 minutes increase steam slightly and steam for 30 more minutes.
10. What procedures should be followed if the condensate has odor?  
Catch it in a drum just like draining heel

#### FRAC TANKS:

11. What should you be sure of before you begin to clean a frac tank that has odor?  
Check that you can chemically neutralize odor
12. Spray the entire frac tank with \_\_\_\_\_ neutraline \_\_\_\_\_ to neutralize odor.
13. What should you be sure of before you clean the frac tank with normal cleaning procedures?  
That the odor has been neutralized

Odor Management Policy (#45) Training Document

1. Whose responsibility is odor management? EVERYONE
2. Who should immediately be notified if odor is detected on or near CES property?  
Processing Manager  
  
If that person is unavailable, who should be contacted?  
Director of Processing, VP of Operations and Maintenance,  
Special Processing Technicians
3. Under what circumstances should odor be ignored?  
  
No circumstances
4. Where is this odor policy located?  
  
Shared Drive in the Policies Folder
5. Where are the SOP's for odor management located?  
  
Shared Drive in the Standard Operating Procedures Folder
6. Who should be contacted if the Processing Technicians are unsure how to process an odorous load?
  - A. Processing Manager
  - B. Lab and Quality Assurance Supervisor
7. Write the name of the people who currently hold the following positions:  
  
Processing Manager    Bo Cumberland  
  
Lab and Quality Assurance Manager    Gary Peterson  
  
Director of Processing    Marlin Moser  
  
Vice President of Operations and Maintenance    Marlin Moser

### Odor Management – Driver Operations Training Document Quiz

1. Due to CES's commitment to control odor, Odor Management Procedures must be followed by \_\_\_\_\_.

2. Any time drivers notice odor, they should immediately take steps to \_\_\_\_\_ the odor and then follow \_\_\_\_\_.

#### Bleeding Off Pressure in Trailers:

3. If a trailer has odor, bleed off the pressure into \_\_\_\_\_.

4. DO NOT \_\_\_\_\_ or \_\_\_\_\_ on trailers containing odorous materials until you are confident the odor can be contained.

5. Any trailer with odor must be connected to a \_\_\_\_\_ before opening the dome lid. Get with \_\_\_\_\_.

6. If unloading off site, bleed pressure \_\_\_\_\_ if possible.

#### Vacuuming on the Yard:

7. If there is odor in a trailer, DO NOT \_\_\_\_\_ on the CES yard.

Why do we have this rule?

8. What should you do if you are asked to pump out a container on the CES yard that contains odorous material?

9. What should you NOT do if the scrubber has an odor?

What should you do?

10. If you are able to drain a scrubber, what should you do with the liquid?

After this quiz has been checked and reviewed, you may consider yourself trained. I,

\_\_\_\_\_, am now responsible for this information.

Odor Management Policy (#45) Training Document

1. Whose responsibility is odor management?
2. Who should immediately be notified if odor is detected on or near CES property?  
  
If that person is unavailable, who should be contacted?
3. Under what circumstances should odor be ignored?
4. Where is this odor policy located?
5. Where are the SOP's for odor management located?
6. Who should be contacted if the Processing Technicians are unsure how to process an odorous load?
  - A.
  - B.
7. Write the name of the people who currently hold the following positions:  
Processing Manager \_\_\_\_\_  
Lab and Quality Assurance Manager \_\_\_\_\_  
Director of Processing \_\_\_\_\_  
Vice President of Operations and Maintenance \_\_\_\_\_

After this quiz has been checked and reviewed, you may consider yourself trained. I,  
\_\_\_\_\_, am now responsible for this information.

# Standard Operating Procedure

<b><u>THINK...</u></b> <b><u>USE GOOD</u></b> <b><u>JUDGMENT</u></b>	 <b>CES Environmental Services, Inc.</b>	<b><u>YOUR</u></b> <b><u>ATTITUDE</u></b> <b><u>COUNTS</u></b>
Date Issued 04/07/08	DEPARTMENT (S) - <u>Operations</u> - <u>Processing</u> - <u>Maintenance and Field</u> <u>Services</u> <u>Tankwash</u>	Revised Date <u>00/00/00</u>
Policy Number <u>08-048</u>	SOP Title: <u>Odor Management – Tank</u> <u>and Trailer Transfers</u>	SOP Description: Explains the correct process for transferring odorous products or waste between tanks and trailers.

## Trailer to Trailer Transfers:

When a load arrives at CES that will need to be taken from one trailer to another trailer the following steps will need to be taken to ensure that no odor will be released during the transfer:

- 1) Locate vent valve on both trailers and hook one end of the hose to trailer A and the other end to trailer B.
- 2) Open the vent valves on both trailers. This will cause the pressure or vapors to equalize between the two trailers.
- 3) Open the discharge valve on trailer A and the fill valve on trailer B and start filling trailer B by turning on the pump.
- 4) Once Trailer B is full and Trailer A is empty, close the suction valve on trailer A and connect the line to air blow-down (allowing the pump to run) until the line is clean. This will ensure that there are no spills and the lines are empty.

**Note: Air should be used for non-flammable materials only; for flammable materials nitrogen must be used to blow the lines.**

**Furthermore, a minimal amount of pressure should be used when blowing lines.**

- 5) Once lines are empty close fill line on Trailer B.
- 6) Shut both vent and remove the air line.

**Trailer to Tank Transfers:**

When a load arrives at CES that will need to be taken from a trailer to a tank the following steps will need to be taken to ensure that no odor will be released during the transfer:

- 1) Locate (but do not open) the vent valve on the Tank you are loading into and the vent valve on the trailer you are loading from; hook one end of the vent hose to the tank and the other end to trailer.
- 2) Open the vent valves on both the Tank and the Trailer. This will cause the pressure or vapors to equalize between the Tank and the Trailer.
- 3) Open the discharge valve on the trailer and the fill valve on tank and start filling the tank by turning on the pump.
- 4) Once the Tank is full and Trailer is empty, close the suction valve on the Trailer and connect the line to air blow-down (allowing the pump to run) until the line is clean. This will ensure that there are no spills and the lines are empty.

**Note: Air should be used for non-flammable materials only; for flammable materials nitrogen must be used to blow the lines.**

**Furthermore, a minimal amount of pressure should be used when blowing lines.**

- 5) Once lines are empty close fill line on the Tank.
- 6) Shut both vent valves and remove the air line.

**Tank to Trailer Transfers:**

When a load of odorous material needs to be loaded from a tank to a trailer on the CES yard, the following steps must be followed to ensure that no odor will be released during the transfer:

- 1) Locate (but do not open) the vent valve on the Trailer you are loading into and the vent valve on the Tank you are loading from; hook one end of the vent hose to the tank and the other end to trailer.
- 2) Open the vent valves on both the Tank and the Trailer. This will cause the pressure or vapors to equalize between the Tank and the Trailer.
- 3) Open the discharge valve on the tank and the fill valve on trailer and start filling the trailer by turning on the pump.
- 4) Once the Trailer is full, close the suction valve on the Tank and connect the line to air blow-down (allowing the pump to run) until the line is clean. This will ensure that there are no spills and the lines are empty.

**Note: Air should be used for non-flammable materials only; for flammable materials nitrogen must be used to blow the lines.**

**Furthermore, a minimal amount of pressure should be used when blowing lines.**

- 5) Once lines are empty close fill line on the Trailer.
- 6) Shut both vent valves and remove the air line.

# Standard Operating Procedure

<b><u>THINK...</u></b> <b><u>USE GOOD</u></b> <b><u>JUDGMENT</u></b>	 <b>CES Environmental Services, Inc.</b>	<b><u>YOUR</u></b> <b><u>ATTITUDE</u></b> <b><u>COUNTS</u></b>
Date Issued 04/07/08	DEPARTMENT (S) - Operations - Processing - Maintenance and Field Services	Revised Date 00/00/00
Policy Number 08-046	SOP Title Odor Management – Driver Operations	SOP Description: Driver operations procedures to be followed when handling odorous loads

**Due to CES's commitment to control odor, it is imperative that odor control procedures are established and followed by ALL CES Employees.**

This Standard Operating Procedure covers all activities where CES Drivers may transport, handle or manager odorous materials. All Drivers **MUST** follow these Standard Operating Procedures carefully. Failure to follow SOP's is grounds for disciplinary action.

#### Odor Identification:

**Any time drivers notice odor, they should immediately take steps to contain the odor and then follow the odorous management procedures listed below.**

#### Bleeding Off Pressure in Trailers:

- If a trailer has odor, bleed pressure off into a drum of deodorizer.
- Don't open dome lids or vent lines on trailers containing odorous material.
- If the trailer has odor inside, get with processing to connect trailer to scrubber before opening the dome lid.
- If unloading (off site) with air/nitrogen, bleed pressure off trailer before leaving site (if allowed)

#### Vacuuming on the Yard:

- If there is an odor inside a trailer, **DO NOT** start the vacuum pump on CES yard. This will allow the odorous air inside the trailer to come out.
- If asked to pump out container on CES yard that is odorous, get with your logistics and/or processing supervisor for further instructions. We do not want to create an odor by loading stinky material.
- Do not drain scrubber on the yard if material has an odor. If material has an odor, get with processing to drain the scrubber and contain odor.
- If you are able to drain scrubber, drain into 5 gallon bucket and get with processing for proper management.

# CES Company Policy

<b><u>THINK...</u></b> <b><u>USE GOOD</u></b> <b><u>JUDGMENT</u></b>	 <b>CES Environmental Services, Inc.</b>	<b><u>YOUR</u></b> <b><u>ATTITUDE</u></b> <b><u>COUNTS</u></b>
Date Issued <u>00/00/00</u>	DEPARTMENT (S) - <u>Operations</u> - <u>Processing</u> - <u>Maintenance and Field Services</u> - <u>Sales, Finance, and Administration</u>	Revised Date <u>04/15/08</u>
Policy Number <u>08-045</u>	Policy Title <u>Odor Management</u>	Policy Description

## I. Overview:

Odor Management is EVERYONE's responsibility at CES. If odor is noticed by ANYONE on or near CES property, the Processing Manager should be notified IMMEDIATELY (unless you have had specific training otherwise). If he is unavailable, notify the Director of Processing, Vice President of Operations and Maintenance or the Special Processing Technicians. Under no circumstances should odor be ignored.

## II. Process to Analyze New Streams:

All materials that come to CES (both waste and product) must have a CES Profile completed and filed in the Job Folder and in the Main Processing Facility Laboratory. The profile approval process is documented in the Standard Operating Procedures Manual (CES for SOP on Profiles #13). An excerpt from SOP #13 follows:

**NOTE: Due to CES's commitment to control odor, it is imperative that odor control procedures are established prior to the receipt of any odorous loads or the approval of profiles for any odorous materials. The Lab and Quality Assurance Supervisor is responsible for establishing protocols that will mitigate the odor of any materials identified as odorous to an acceptable level. These protocols will be recorded in the Treatment and Handling section of the Process Facility Information. It is the responsibility of the Sales Representatives to ensure that all odorous materials are identified as**

**such and samples are submitted to the Lab so odor control procedures may be established prior to the receipt of any such loads.**

### **III. Standard Operating Procedures for identifying and handling odorous loads:**

The following Standard Operating Procedures are all part of the odor control process. They are located on the shared drive in the Standard Operating Procedures Folder.

#### **SOP on Profiles #13:**

Specifically addresses identification of odorous streams and requires that the process for mitigating the odor be recorded in the Treatment and Handling section of the Process Facility Information.

#### **SOP on Shipping and Receiving Loads – Receiving Loads #54:**

Requires that the main Processing Facility Laboratory Personnel follow the Process Facility Information; specifically, the Treatment and Handling section which explains how odorous loads are to be processed to mitigate the odor.

#### **SOP for Odor Management – Driver Operations #46:**

Describes the procedures CES drivers must follow when handling odorous materials.

#### **SOP for Odor Management – Sampling Odorous Materials #47:**

Describes the processes that must be followed to verify whether or not a load is odorous and the correct sampling procedures are followed to ensure odor is contained when pulling a sample from odorous loads.

#### **SOP for Odor Management – Tank and Trailer Transfers #48:**

Explains the process for transferring materials from one container to another container to ensure no odor is released during the transfer.

#### **SOP for Odor Management – Cleaning Tanks #49:**

Explains the procedures for cleaning tank trailers, frac tanks, and vacuum boxes that contain odorous materials.

#### **SOP for Odor Management – Changing Scrubber Liquids #50:**

Describes the procedures that must be followed to change scrubber liquids without releasing odor.

#### **SOP for Odor Management – Scrubber Repairs #51:**

Describes the procedures that must be followed to repair and/or clean a scrubber in such a way that odor is not released.

#### **SOP for Odor Management – Distillation Repairs and Cleaning #52:**

Explains the procedures that must be followed to repair and/or clean the distillation unit in such a way that odor is not released.

#### **SOP for Scrubber Operation and Maintenance #44:**

Explains the process for operating, monitoring, and maintaining the scrubbers to ensure that all odor is contained during the processing of odorous materials on CES property.

#### **IV. Complex Processing for Special Streams:**

Streams that are identified as complex for processing purposes will require additional training of all employees who will be processing the stream. These streams are identified as Complex if there are any safety concerns or if the "Treatment and Handling" section of the Process Facility Information is too complicated to fit in the allotted space. The Processing Manager and/or the Lab and Quality Assurance Manager should be contacted if someone is unsure of processing instructions.

#### **V. Training and Documentation:**

All employees will be trained on odor the Odor Control Policy and SOP's listed above according to their job responsibilities. It will be responsibility of the immediate supervisor, manager, or director to ensure that all employees who may possibly be in a position to handle odorous materials are properly trained.

VACUUM BOXES:

14. Vacuum boxes can be cleaned using the same method as a \_\_\_\_\_ tank trailer \_\_\_\_\_

With the exception that \_\_\_\_\_ flanges \_\_\_\_\_ will be used to steam and scrub since there are no clean out ports.

15. What should you do if you cannot control the odor?

Contact supervisor

After this quiz has been checked and reviewed, you may consider yourself trained. I,

\_\_\_\_\_, am now responsible for this information.

Sign In Sheet for SOP for Odor Control

I have read and been trained in the policy and procedures for odorous loads in trailers, roll-off boxes, and frac tanks while on CES property.

# Equipment Damage Meeting

- I. JEROME D CASTON
- II. Jose A Encina
- III. Jose Luis TORRES
- IV. Jorge Lara
- V. Sergio Torres
- VI. JOAQUIN ALVAREZ
- VII. MARCUS WAYNE COOPER
- VIII. Cteencio padron
- IX. Armando Rodriguez
- X. R. Edwards

- Once pressure is relieved, remove a clean out port and install a fitting that will connect to the overhead vapor scrubber.
- Connect the scrubber hose to the clean out port and open the valve to the overhead vapor scrubber to begin scrubbing the vapor.
- Then open the dome lid and check for heel; if heel is present, shut the dome lid, drain the heel into a drum by connecting a hose to the bottom discharge of the trailer and the other end of the hose to the 2 inch bung on a drum. Vent the drum to the liquid scrubber or a bucket of water.
- After heel is drained, connect a steam line to another clean out port add a quart of NUETRALINE to the trailer and begin steaming slowly for 15 minutes. After 15 minutes increase steam slightly and steam for 30 more minutes. Drain the condensate slowly checking it for odor if the condensate has odor, catch it in a drum using the same procedure as draining heel until the condensate no longer has odor.
- Once the condensate has no odor finish cleaning the tank normally.

#### **Frac tanks**

**Do not attempt to clean a frac tank that has an odor that we can not chemically neutralize before we begin cleaning.**

- Park the tank in the bay, chalk the wheels and ground the frac tank.
- Spray the entire frac tank with NUETRALINE to neutralize odor
- Check the tank to ensure odor is neutralized
- Clean the frac tank with normal cleaning procedures

#### **Vacuum boxes**

- Vacuum boxes can be done using the same method as a tank trailer with the exception that the flanges will be used to steam and scrub since they have no clean out ports.
- If the box had sludge, the only option may be to attempt to neutralize with NUETRALINE
- If controlling the odor is too difficult, contact your supervisor

Tank to Trailer Transfers:

14. Locate (but do not \_\_\_\_\_) the vent valve on the Trailer you are loading into and the vent valve on the Tank you are loading from; hook one end of the vent hose to the \_\_\_\_\_ and the other end to \_\_\_\_\_.
15. Open the \_\_\_\_\_ on both the Tank and the Trailer. This will cause the pressure or \_\_\_\_\_ between the Tank and the Trailer.
16. Open the \_\_\_\_\_ on the tank and the \_\_\_\_\_ on the trailer and start filling the trailer by turning on the pump.
11. Once the trailer is full and the tank is empty, what is the next step?
12. Once the lines are empty, close the \_\_\_\_\_ on the trailer.
13. Shut both \_\_\_\_\_ and remove the \_\_\_\_\_.

After this quiz has been checked and reviewed, you may consider yourself trained. I,

\_\_\_\_\_, am now responsible for this information.

### Odor Management – Tank and Trailer Transfers Training Document Quiz

#### Trailer to Trailer Transfers:

1. Locate the \_\_\_\_\_ on both trailers and hook one end to trailer A and the other end to trailer B.
2. What is the next step?

Why?

3. Open the \_\_\_\_\_ on trailer A (loaded trailer) and the \_\_\_\_\_ valve on trailer B (empty trailer) and start filling trailer B by filling the pump.
4. When you are through transferring, close the \_\_\_\_\_ valve on trailer A and connect the line to \_\_\_\_\_ until \_\_\_\_\_.
5. What will the above procedure ensure?
6. Once the lines are empty, close the \_\_\_\_\_ for trailer B.
7. Shut both \_\_\_\_\_ and remove the \_\_\_\_\_.

#### Trailer to Tank Transfers:

8. Locate (but do not \_\_\_\_\_) the vent valve on the Tank you are loading into and the vent valve on the Trailer you are loading from; hook one end of the vent hose to the \_\_\_\_\_ and the other end to \_\_\_\_\_.
9. Open the \_\_\_\_\_ on both the Tank and the Trailer. This will cause the pressure or \_\_\_\_\_ between the Tank and the Trailer.
10. Open the \_\_\_\_\_ on the trailer and the \_\_\_\_\_ on the tank and start filling the tank by turning on the pump.
11. Once the tank is full and the trailer is empty, what is the next step?
12. Once the lines are empty, close the \_\_\_\_\_ on the tank.
13. Shut both \_\_\_\_\_ and remove the \_\_\_\_\_.

Hello Brenda,

The 2 invoices that I sent along with the ones that need PO's have not been paid. Can you please give me an update on this?

Thank you in advance,

Bird
